

Sodium salt (sodium sulfanilate), classifiable under the HTS subheading 2921.42.90, is a powder, granular or crystalline material which contains 75 percent minimum equivalent sulfanilic acid, 0.5 percent maximum aniline based on the equivalent sulfanilic acid content, and 0.25 percent maximum alkali insoluble materials based on the equivalent sulfanilic acid content.

Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of these proceedings is dispositive.

Analysis of Comments Received

A complete discussion of all issues raised with respect to these sunset reviews is provided in the accompanying Issues and Decision Memorandum, which is hereby adopted by this notice.⁶ The issues discussed in the Issues and Decision Memorandum include the likelihood of continuation or recurrence of dumping and the magnitude of the margins of dumping likely to prevail if the *Orders* were revoked. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System ("ACCESS"). ACCESS is available to registered users at <https://access.trade.gov> and to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed at <http://enforcement.trade.gov/frn/>. The signed Issues and Decision Memorandum and the electronic version of the Issues and Decision Memorandum are identical in content.

Final Results of the Sunset Reviews

Pursuant to sections 751(c)(1) and 752(c)(1) and (3) of the Act, the Department determines that revocation of the AD orders on sulfanilic acid from India and the PRC would likely lead to a continuation or recurrence of dumping, and that the magnitude of the dumping margins likely to prevail would be weighted-average margins up to 71.09 percent for India, and up to 85.20 percent for the PRC.

The United States and Since Hardware have entered into an agreement to settle the outstanding litigation. The Court issued its Judgment on December 8, 2016.⁴

Cash Deposit Requirements

Because Since Hardware has a superseding review,⁵ these amended finals do not establish a revised cash deposit rate for Since Hardware.

Notification to Importers

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred, and the subsequent assessment of double antidumping duties.

We are issuing this determination and publishing these amended final results of antidumping duty administrative review pursuant to the Court's Judgment.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a current information collection.

United States' (U.S.) participation in the Inter-American Tropical Tuna Commission (IATTC) results in certain record keeping requirements for U.S. vessel owners and operators who fish in the IATTC's area of management responsibility. Vessel owners and operators must maintain a log of all operations conducted from the fishing vessel, entering the date, noon position, and the tonnage of fish aboard by species. The purse seine bridge logbook provided by the IATTC is used by all United States purse seine vessel owners and operators. In addition, vessel owners and operators of large purse seine vessels (*i.e.*, with at least 363 metric tons of fish hold volume) that fish with FADs in the Eastern Pacific Ocean (EPO) are required to collect data specific on fish aggregating devices (FADs) to meet international obligations under IATTC Resolution C–16–01. Owners and operators of a FAD would be required to record data for each interaction with a FAD through a FAD form provided by the IATTC or through a FAD form provided by NMFS that combines the bridge logbook with the FAD Form. Data collected from FADs will allow IATTC scientific staff to distinguish a particular FAD when analyzing data and can track the activities on a FAD through time.

II. Method of Collection

Vessel operators maintain bridge logs on a daily basis and FAD forms are completed for each FAD interaction.

Bridge logs and FAD forms can be either emailed or mailed to the IATTC and also National Marine Fisheries Service (NMFS) Southwest Fisheries Science Center at the completion of each trip. These data are processed and maintained as confidential by the IATTC and by NMFS.

III. Data

Form Number(s): None.

Type of Review: Regular (extension of a current information collection).

Affected Public: Individuals or households; business or other for-profit organizations.
