SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulation (at 5CFR 1320.8(d)), an agency must ask for public comment on the following:

(i) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) How to enhance the quality, utility, and clarity of the information to be collected;

(iv) How to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

In compliance with these requirements, NHTSA asks for public comments on the following collections of information:

(1) *Title:* Reporting of Information and Documents about Potential Defects—49 CFR part 579.

OMB Control Number: 2127-0616.

Affected Public: Manufacturers of motor vehicles and motor vehicle equipment.

information to NHTSA, including information about claims and notices about deaths and serious injury, property damage data, communications to customers and others, and information on incidents resulting in fatalities or serious injuries from possible defects in vehicles or equipment in the United States or in identical or substantially similar vehicles or equipment in foreign countries. The statute also authorized NHTSA to require the submission of other data that may assist in the identification of safety-related defects in vehicles and equipment.

Information and documents submitted is intended to provide NHTSA with "early warning" of potential safety-related defects in motor vehicles and motor vehicle equipment. NHTSA will rely on the information provided (as well as other relevant information) in deciding whether to open safety defect investigations.

Reporting of Information About Foreign Safety Recalls and Campaigns Related to Potential Defects (OMB Control Number 2127-0620) will not be addressed separately and will be merged with this request for collections.

Estimated Annual Burden Cost: \$1,721,877.

Estimated Annual Burden Hours: 20,102 hours.

Number of Respondents: 500.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.
