

informing the public of the data required to support the tolerance and stating the time period for submitting the required data. Regardless of whether a tolerance applies solely to domestic food uses or solely to imported foods, the same technical chemistry and toxicology data are required to support tolerances under FFDCA section 408. For pesticide chemicals used in or on food, EPA requires residue chemistry data that are representative of growing conditions in exporting countries in the same manner that the EPA requires representative residue chemistry data from different U.S. regions to support domestic use of the pesticide and the tolerance. Persons supporting the maintenance or modification of tolerances to cover residues in or on imported food have the burden of demonstrating the relevance of any existing domestic data to foreign growing conditions.

If EPA does not receive any indication of a need to retain a tolerance for imported foods following the cancellation of the registered food use, the Agency will publish in the **Federal Register** a notice proposing to revoke the tolerance. That notice will again give interested parties the opportunity to come forward to support the maintenance of the tolerance.
