

As per 2 CFR part 200.329, all recipients of non-construction federal financial assistance awards are required to provide performance (technical) reports to the agency at intervals no less frequently than annually and no more frequently than quarterly in order for the agency to properly monitor the award and meet oversight responsibilities. The awarding agency must use OMB-approved common forms for this purpose or seek permission for program-specific forms that will collect the required data elements. The Coral Reef Conservation Program seeks OMB approval to revise this information collection to require use of a program-specific form for semi-annual reporting and tracking specific indicators. These indicators align with the new Coral Reef Conservation Program Strategic Plan (2018; https://www.coris.noaa.gov/activities/strategic_plan2018) and will be used to track national progress toward these strategic goals through 2040. The program-specific form for semi-annual reporting will be a revised version of what is currently in use for NOAA's Marine Debris Program and will standardize reporting across projects.

The number of respondents, responses, and burden hours have been corrected from the previous submission. The previous submission included federal employees and contractors working on behalf of NOAA as part of the burden for the collection. This burden has been removed and is instead added to the cost to the federal government.

Affected Public: Business or other for-profit organizations; Not-for-profit institutions; State or Local Government; Federal government.

Frequency: Semi Annual to Annual.

Respondent's Obligation: Required to obtain or retain benefits.

Legal Authority: Coral Reef Conservation Act of 2000 (16 U.S.C. 6401 *et seq.*).

This notice allows for an additional 30 days for public comments.
