SUPPLEMENTARY INFORMATION:

A. Purpose

The Federal Acquisition Regulation (FAR) clause at 52.222-32, Davis-Bacon Act—Price Adjustment (Actual Method), requires that a contractor must submit at the exercise of each option to extend the term of the contract, including a statement of the amount claimed for incorporation of the most current wage determination by the Department of Labor, and any relevant supporting data, including payroll records, that the contracting officer may reasonably require. The contracting officer may include this clause in fixed-price solicitations and contracts, subject to the Davis-Bacon Act, that will contain option provisions to extend the term of the contract. Generally, this clause is only appropriate if contract requirements are predominantly services subject to the Service Contract Act and the construction requirements are substantial and segregable.

CHANGES:

* * * * *

SYSTEM NAME:

Delete entry and replace with "Aviation Resource Management System (ARMS)".

* * * * *

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Line eight, after "aviation" add "or parachutist". Line nine, after "flying" add "or parachutist". Line eleven, after "flying" add "or jump".

CATEGORIES OF RECORDS IN THE SYSTEM:

Delete first paragraph and replace with "The ARMS data base contains a master file of flying and jump records for each individual in categories listed above, a month-to-date transaction file and a twelve month history file, and career flying and jump history. A centralized file of selected information from each individual's master record is also maintained at HQ USAF. In addition to automated data files, this system uses manual files for maintaining historical data and important source documents. An Individual Flight Record Folder (FRF) or Jump Record Folder (JRF) is established for each category of fliers and jumpers listed above and is the prime repository for a computer listing which itemizes each individual's flight and jump accomplishments as well as various source documents which serve to validate information entered into the computer data base for the system. Each Host Aviation Resource Management (HARM) office maintains a file of Aeronautical Orders and Military Pay Orders to provide source documentation of flying pay actions initiated by the flight manager. Information that is maintained in the automated files is derived directly from the ARMS master file or from subsequent processing of information entered into the master file.

PURPOSE(S):

Delete entry and replace with "The ARMS provides information and automated data processing capabilities used to manage and administer Air Force aviation and parachutist management such as aircrew and parachutist training and evaluation, flight and jump scheduling functions, flying and parachutist safety and related functions needed to attain and maintain combat or mission readiness. All information is entered into the system at the air base level. This information is then processed for use by flying or parachutist resource managers at all levels through periodic computer product reports or automated systems interfaces.

The specific uses of information and user categories for this system are:

Base Level Activities—(1) to establish each member's flying or jump pay entitlement status and to monitor continuing entitlement in accordance with existing directions;

(2) to record each individual's flying or jump activities, including hours, jumps, and specific events, and provide indications of successful attainment of standards or deficiencies;

(3) to establish each individual's Aviation Service code for use in indicating type of flying or jump activity or reason for inactive status if applicable;

(4) to determine each rated member's eligibility to perform operational flying or jumping in accordance with existing USAF directives;

(5) to provide an indication of each rated member's total operational flying time in terms of total aviation or parachutist career duties;

(6) to establish 'suspense lists' for use in scheduling flying personnel for flights, schools, tests and similar events directly related to their duties as professional airmen;

(7) to provide each applicable individual and manager with all aviation career profile information needed to monitor flying career development, professional qualifications and training deficiencies;

(8) to provide information requested by the Air Staff, major command, or other base functions, which relates to the flying duties and accomplishments of all personnel in the file;

(9) to provide statistical data for management analysis and review of all aspects of each base's flying programs.

Other Base Users: Military Personnel Flight—uses information provided by this system, through an automated data interface, to report the flying status of all individuals in the files; provides flying career background information used for assignment actions.

Accounting and Finance Office—uses Military Pay Orders, prepared by aviation management offices, to start and stop flying and jump incentive pay in accordance with each individual's flying status and eligibility as reflected by the information in the system; uses the files to perform payment audits to identify individuals being paid improperly.

Base Supply—uses flying status information to determine which individuals are qualified to draw all authorized flying and jump equipment.

Base Medical Facility—uses system data to determine projected workloads associated with scheduled flight physical examinations.

Major Commands—use all system data to measure the effectiveness of subordinate unit training programs and to check command-wide flying effectiveness.

Air Force Personnel Center—uses ARMS information to establish assignment objectives and career development programs for USAF military personnel in the system.

HQ USAF—uses various identification and flying data to establish statistical data needed to verify the effectiveness of standard procedures, determine the need for policy modification, provide a timely and accurate census of various types of flyers and jumpers and provide a centralized point for collection and collation of data used by all levels of management.

The Defense Finance and Accounting Service uses ARMS information to validate all flying and jump payments.”
