

compliance, and are required of all affected facilities subject to the NESHAP.

Form Numbers: None.

Respondents/affected entities:
Primary magnesium refining facilities.

Respondent's obligation to respond:
Mandatory 40 CFR 63, Subpart TTTT.

Estimated number of respondents:
One (total).

Frequency of response: Semiannually.

Total estimated burden: 972 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$116,000 (per year), which includes \$1,200 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The burden in this ICR has been adjusted to account for more accurate estimates for performance testing costs based on consultations with industry. The previous ICR assumed that a single performance test was conducted once every three years by the affected facility. This ICR adjusts the performance testing costs to reflect that the facility conducts separate performance tests for individual units during the term of the ICR. The regulation, 40 CFR 63.9912, requires performance testing no less frequently than twice (at mid-term and renewal) of each term of the Title V permit, or every 2.5 years, for each emission point. For the facility subject to this rule, we have clarified that multiple emission points must be tested twice during the Title V permit term, with approximately 20 percent of units anticipated to require a retest. This ICR therefore assumes that performance tests are conducted for approximately two emission units in each year during the three-year period of this ICR. Therefore, labor costs have been adjusted to account for submission of notification and reports for performance tests twice annually. This change also results in an increase in the number of responses.

Courtney Kerwin,

Director, Regulatory Support Division.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9877-01-R6]

Clean Air Act Operating Permit Program; Petitions for Objection to State Operating Permit for Gulf Coast Growth Ventures, LLC, Olefins, Derivative, and Utilities Plant, San Patricio County, Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final Order on Petition for objection to Clean Air Act title V operating permit.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an Order dated May 12, 2022, granting in part and denying in part a Petition dated February 24, 2021 from the Environmental Integrity Project, Sierra Club, Coastal Alliance to Protect our Environment, and Texas Campaign for the Environment. The Petition requested that the EPA object to a Clean Air Act (CAA) title V operating permit issued by the Texas Commission on Environmental Quality (TCEQ) to Gulf Coast Growth Ventures (GCGV), LLC, for its Olefins, Derivative, and Utilities Plant located in San Patricio County, Texas.

ADDRESSES: The EPA requests that you contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section to view copies of the final Order, the Petition, and other supporting information. Out of an abundance of caution for members of the public and our staff, the EPA Region 6 office may be closed to the public to reduce the risk of transmitting COVID-19. Please call or email the contact listed below if you need alternative access to the final Order and Petition, which are available electronically at: <https://www.epa.gov/title-v-operating-permits/title-v-petition-database>.

FOR FURTHER INFORMATION CONTACT: Aimee Wilson, EPA Region 6 Office, Air Permits Section, (214) 665-7596, wilson.aimee@epa.gov.

SUPPLEMENTARY INFORMATION: The CAA affords the EPA a 45-day period to review and object to, as appropriate, operating permits proposed by state permitting authorities under title V of the CAA. Section 505(b)(2) of the CAA authorizes any person to petition the EPA Administrator to object to a title V operating permit within 60 days after the expiration of the EPA's 45-day review period if the EPA has not objected on its own initiative. Petitions must be based only on objections to the permit that were raised with reasonable

specificity during the public comment period provided by the state, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or unless the grounds for the issue arose after this period.

The EPA received the Petition from the Environmental Integrity Project, Sierra Club, Coastal Alliance to Protect our Environment, and Texas Campaign for the Environment dated February 24, 2021, requesting that the EPA object to the issuance of operating permit no. O4169, issued by TCEQ to the Olefins, Derivative, and Utilities Plant in San Patricio County, Texas. The Petition claims the proposed permit was issued before GCGV complied with applicable public participation requirements and fails to include and assure compliance with all applicable requirements.

On May 12, 2022, the EPA Administrator issued an Order granting in part and denying in part the Petition. The Order explains the basis for the EPA's decision.

Dated: June 9, 2022.

Dzung Ngo Kidd,

Acting Director, Air and Radiation Division, Region 6.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Toxic Chemical Release Reporting (Revision)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), Toxic Chemical Release Reporting (EPA ICR Number 2613.04, OMB Control Number 2070-0212) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a request to revise an existing ICR that is currently approved through March 31, 2024. Public comments were previously requested via the **Federal Register** on November 15, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before July 15, 2022.

ADDRESSES: Submit your comments to EPA, referencing Docket ID No. EPA-HQ-OPPT-2021-0303, online using www.regulations.gov (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 2821T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Katherine Sleasman, Regulatory Support Branch (7101M), Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 566-1204; email address: sleasman.katherine@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: Pursuant to section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA), 42 U.S.C. 11001 *et seq.*, certain facilities that manufacture, process, or otherwise use specified toxic chemicals in amounts above reporting threshold levels as provided in 40 CFR 372.25 must submit annually to EPA reporting forms to the Toxics Release Inventory (TRI). The revisions to this

ICR covers the information collection activities associated with the submission of information to TRI pursuant to EPCRA section 313(b)(2), 42 U.S.C. 11023. Under EPCRA section 313(b)(2), the EPA Administrator has the authority to extend TRI reporting requirements to specific facilities that manufacture, process, or otherwise use a TRI-listed toxic chemical, but who are not currently covered by TRI reporting requirements as described at 40 CFR 372. The Administrator may determine a specific facility warrants TRI reporting on the basis of a chemical's toxicity, the facility's proximity to other facilities that release the chemical or to population centers, the facility's history of releases of the chemical, or other factors that the Administrator deems appropriate. This ICR revision includes discussion of EPA's discretionary authority under EPCRA section 313(b)(2) and outreach to potential stakeholders.

Form Numbers: 9350-1 and 9350-2.

Respondents/affected entities: The facility has 10 or more full-time employee equivalents; the facility is included in a NAICS Code listed at 40 CFR 372.23 or under E.O. 13148, Federal facilities regardless of their industry classification; and the facility manufactures (defined to include importing), processes, or otherwise uses any EPCRA section 313 (TRI) chemical in quantities greater than the established thresholds for the specific chemical in the course of a calendar year. EPA may also exercise its discretionary authority under EPCRA section 313(b)(2) to extend TRI reporting obligations to a facility.

Respondent's obligation to respond: Mandatory, 40 CFR 372 and EPCRA section 313.

Estimated number of respondents: 76,579 (total).

Frequency of response: Annual.

Total estimated burden: 3,616,827 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$257,011,726 (per year), includes no annualized capital or operation & maintenance costs.

Changes in the estimates: There is an increase of 1700 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The additional hours are a result of an increase in 3 burden hours per facility in non-reporting burden. This increase also reflects the review of the notification and preparation of responses stakeholders may engage in upon receipt of the Agency's notification of its potential application of the discretionary authority under

EPCRA section 313(b)(2) to specific facilities. This increase is categorized as a program change. Additionally, in December 2021, the EPA Administrator determined that 29 facilities warrant the extension of TRI reporting requirements under the authority in EPCRA section 313(b)(2) for specific chemicals; the updated burden estimates reflect potential reporting from these facilities.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9641-01-OMS]

Privacy Act of 1974; System of Records

AGENCY: Office of Land and Emergency Management (OLEM), Environmental Protection Agency (EPA).

ACTION: Notice of a modified system of records.

SUMMARY: The U.S. Environmental Protection Agency's (EPA), Office of Land and Emergency Management (OLEM), Office of Superfund Remediation and Technology Information (OSRTI), is giving notice that it proposes to modify a system of records pursuant to the provisions of the Privacy Act of 1974. Superfund Enterprise Management System (SEMS) is being modified to expand the categories of records that may be housed in SEMS and the categories of individuals who may be covered by the system. Additionally, EPA is modifying SEMS to add General Routine Uses B, D, and M, modify General Routine Use L, and add three Specific Routine Uses. The new Specific Routine Uses are related to disclosure of records to protect the environment or public health or safety, including carrying out an investigation or response; to share information with the public in cases of emergency to protect the environment or public health and safety; and to respond to other external requests for information to support programmatic functions. This system of records is an electronic repository of Superfund documents routinely used to house and organize data and information regarding Superfund sites. Records contained in SEMS are used in support of programmatic functions including investigation; cleanup; program planning; community outreach; coordination with state, local and tribal entities; listing and de-listing of
