SUPPLEMENTARY INFORMATION: On May 2, 2019, in DOE/FE Order No. 4373 (as amended),¹ DOE authorized Louisiana LNG to export domestically produced LNG by vessel from the proposed Woodside Louisiana LNG Project

(Project) ² in Calcasieu Parish, Louisiana, to any country with which the United States has not entered into a free trade agreement (FTA) requiring national treatment for trade in natural gas, and with which trade is not prohibited by U.S. law or policy (non-FTA countries).³ Louisiana LNG is authorized to export this LNG in a volume equivalent to 1,415.3 billion cubic feet per year (Bcf/yr) of natural gas for a term extending through December 31, 2050.⁴

As relevant here, Order No. 4373 requires Louisiana LNG to "commence export operations using the planned liquefaction facility no later than seven years from the date of issuance of this Order"—*i.e.*, by May 2, 2026.⁵ In the Request, Louisiana LNG asks DOE to grant an extension of the export commencement deadline in its non-FTA authorization, "so that it may commence exports from the Project by December 31, 2029." ⁶

In support of this Request, Louisiana LNG states that, in 2024, the Federal Energy Regulatory Commission (FERC) granted Louisiana LNG's request for a three-year extension to complete construction and place the Project inservice.⁷ Louisiana LNG further states that, on May 13, 2025, it submitted a second request for extension to FERC, seeking an additional eight-month period, until December 31, 2029 (the same date as requested in this proceeding), to complete construction and place the Project in-service.8 Louisiana LNG also identifies the actions it has taken to date toward the development of the Project. Louisiana LNG states that it has "made substantial progress" in developing the Project, and that "there is significant evidence
