The licensee states that it is planning to conduct repairs to reconstruct the lower woodstave conduit and replace some adjoining piping above the Potter Valley powerhouse. The licensee states that it needs to dewater the lower portion of the water conveyance system to conduct this work. In order to complete the work, the licensee is requesting a temporary variance of its Normal water year minimum flow requirement of 35 cubic feet per second (cfs) between November 1, 2015 and March 15, 2016. During this time, the licensee proposes to release flows through a conduit into a seasonal creek that is a tributary to the East Branch Russian River immediately downstream of the project powerhouse. The licensee states that during the repair period, it would release a minimum flow of 20 cfs from the conduit into the East Branch Russian River, which would include the release of up to 5 cfs for the Potter Valley Irrigation District. The licensee states that if site conditions reach a Critically Dry water year status, it would instead, maintain the license-required minimum flow of 5 cfs. Finally, the licensee

proposes to regularly monitor the interim flows in the seasonal tributary. Upon completion of construction, the licensee states that it would notify the resource agencies and return to the license-required flows.

[Project No. 2503–154]

Duke Energy Carolinas, LLC; Notice of Availability of Draft Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and

the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for a new license for the Keowee-Toxaway Hydroelectric Project, located on the Toxaway, Keowee, and Little Rivers in Oconee County and Pickens County, South Carolina and Transylvania County, North Carolina, and has prepared a draft Environmental Assessment (EA) for the project. The project does not occupy federal land.

The draft EA contains staff's analysis of the potential environmental impacts of the project and concludes that relicensing the project, with appropriate environmental measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the draft EA is on file with the Commission and is available for public inspection. The draft EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link.
