

2. Providing the Collaborator with human lymphoma samples suitable for proteomic and genomic analysis.

3. Planning research studies and interpreting research results.

4. Publishing research results.

The role of the CRADA Collaborator may include, but not be limited to:

1. Providing significant intellectual, scientific, and technical expertise or experience to the research project.

2. Providing essential research materials, such as enzymes or other reagents, extracts, compounds, hardware, software and access to databases.

3. Planning research studies and interpreting research results.

4. Providing technical expertise and/or financial support (e.g. facilities, personnel and expertise) for CRADA-related research as outlined in the CRADA Research Plan.

5. Publishing research results.

Selection criteria for choosing the CRADA Collaborator may include, but not be limited to:

1. The ability to collaborate with NCI on research and development of this technology involving the development of lymphoma vaccines. This ability can be demonstrated through experience, expertise, and the ability to contribute intellectually in this or related areas.

2. The demonstration of adequate resources to perform the research, development and commercialization of this technology (e.g. facilities, personnel and expertise) and accomplish objectives according to an appropriate timetable to be outlined in the CRADA Collaborator's proposal.

3. The willingness to commit best effort and demonstrated resources to the research, development and commercialization of this technology as defined above.

4. The demonstration of expertise in the commercial development, production, marketing and sales of antitumor products.

5. The willingness to cooperate with the National Cancer Institute in the timely publication of research results.

6. The agreement to be bound by the appropriate DHHS regulations relating to human subjects, PHS policies relating to the use and care of laboratory animals, and the dissemination of research tools according to NIH policy.

7. The willingness to accept the legal provisions and language of the CRADA with only minor modifications, if any. These provisions govern the equitable distribution of patent rights to CRADA inventions. Generally, the rights of ownership are retained by the organization that is the employer of the inventor, with (1) the grant of a license

for research and other Government purposes to the Government when the CRADA Collaborator's employee is the sole inventor, or (2) the grant of an option to elect an exclusive or non-exclusive license to the CRADA Collaborator when the Government employee is the sole inventor.
