

25,000 lb./yr. but less than 1,000,000 lb./yr. EPA's ongoing efforts under ChAMP to screen and prioritize the risks of chemicals will be a major component of EPA's efforts to meet its SPP commitments.

EPA believes that an adaptation of the modified VCCEP approach could provide a flexible framework to further evaluate certain chemicals identified by EPA in its ChAMP screening-level assessments as presenting special concerns and associated follow-up action involving hazard/exposure data development or assessment.

EPA believes that in most instances, the detailed evaluation of SPP follow-up cases under the modified VCCEP approach should generally begin at Tier 1. Sponsor-developed assessments should build on EPA's SPP screening-level assessments, consider EPA recommended follow-up actions (including conducting higher tier tests specifically identified as priorities by EPA on the basis of its initial assessment), and include a more highly developed quantification of exposures.
