FOR FURTHER INFORMATION CONTACT: Dr. Daniel Gurdak at telephone (212) 637-3634 or by mail at Environmental Protection Agency, Region 2, 290 Broadway, New York, New York 10007-1866.

SUPPLEMENTARY INFORMATION: New York submitted the 2018 New York CWA Section 303(d) list (New York 2018 303(d) list) to EPA in correspondence dated November 13th, 2020 (followed up by a correction on December 7th, 2020, and a supplement on February 10th, 2022). On March 10, 2022, EPA partially approved and partially disapproved the New York 2018 303(d) list. Specifically, EPA approved the New York 2018 303(d) list with respect to the 835 waterbody/pollutant combinations requiring TMDLs that New York included on the list and the State's priority ranking for these waterbody/pollutant combinations.

However, EPA disapproved the New York 2018 303(d) list because EPA determined that it does not include twenty-two (22) waterbody/pollutant combinations that meet CWA Section 303(d) listing requirements.

For a detailed explanation of EPA's partial approval/partial disapproval, please refer to EPA's Support Document (<https://www.epa.gov/tmdl/new-yorkimpaired-waters-list>). EPA is providing the public the opportunity to review its decision to add these 22 waterbody/pollutant combinations to the New York 2018 303(d) list.

EPA is disapproving the New York 2018 303(d) list because EPA has determined that New York did not include twenty-two (22) waterbody/pollutant combinations on the 2018 303(d) list that meet 303(d) listing requirements, including:

- 17 waterbody/pollutant combinations that New York improperly delisted because data and information indicate that an applicable water quality standard is not met, including:

- 4 waterbody/pollutant combinations where the applicable water quality criterion for odors is not met

- 9 waterbody/pollutant combinations where data and/or information indicate that the applicable water quality criterion/criteria for floatables is/are not met.

- 2 waterbody/pollutant combinations where the applicable water quality criterion for dissolved oxygen is not met

- 1 waterbody/pollutant combination where data and/or information indicate the presence of harmful algal blooms (HABs), which in turn, indicates that an applicable water quality standard is not met.

- 1 waterbody/pollutant combination for an assessment unit under 6.4 acres where data and/or information indicate that the applicable water quality criterion for dissolved oxygen is not met.

- 5 waterbody/pollutant combinations that New York did not include on the State's 2016 and/or 2018 303(d) lists, including:

- 1 waterbody/pollutant combination that EPA listed on the New York 2014 303(d) list where data and/or information indicate that the applicable narrative water quality criterion for nutrients is not met.

- 3 waterbody/pollutant combinations where data and information indicate the presence of HABs, which in turn, indicates that an applicable water quality standard is not met. New York did not demonstrate that no pollutant is causing the impairment of this water, did not include this waterbody/pollutant combination on the 2018 303(d) list and inappropriately categorized this waterbody/pollutant combination.

- 1 waterbody/pollutant combination where data and/or information indicate the presence of HABs, which in turn, indicates that an applicable water quality standard is not met. New York did not include this waterbody/pollutant combination on the 303(d) list or in any other category.
