Description

Human remains representing, at minimum, 377 individuals were removed from Alameda County, CA. The Ryan Mound collection was excavated by a team from San Jose State University from 1962–1968. The excavations recovered materials from three distinct strata, all of which contained burials and cultural remains. The CA–ALA–329 collection was split between SJSU and Stanford University in 1962; Stanford repatriated their holdings in 1989 to Muwekma Ohlone Tribe of the San Francisco Bay Area. The collection at SJSU was transferred in January 2004 from the Biological Sciences Department to Anthropology Department and was covered in a culturally unidentifiable Native American inventory in 2006. The 102 boxes of associated funerary objects include groundstone (mortars, pestles), other artifacts (charmstones, lithics and tools, beads, pendants), faunal remains and shell, charcoal, or soil samples.
