

the community. Responses to all comments received during the public comment period were included in the Responsiveness Summary included in the ROD for OU1. Additionally, the administrative record for OU1 was made available at the Tooele Public Library throughout the OU1 investigation process. Monthly town forums were held to receive feedback and disseminate information throughout the OU1 investigation and cleanup process.

#### Current Status

Based on the successful completion of EPA's removal action and UDEQ's remedial action, there are no further response actions planned or scheduled for OU1. Pursuant to the NCP, a five-year review will be performed at OU1.

While EPA and UDEQ do not believe that any future response actions at OU1 will be needed, if future conditions warrant such action, the proposed deletion area remain eligible for future Fund-financed response actions. Furthermore, this partial deletion does alter the status of OU2 or OU3 which are not proposed for deletion and remain on the NPL.

EPA, with concurrence from the State of Utah, has determined that all appropriate CERCLA response actions have been completed at OU1 and protection of human health and the environment has been achieved. Therefore, EPA is deleting OU1 of the Jacobs Smelter Superfund Site from the NPL. This action will be effective July 31, 2001. However, if EPA receives dissenting comments within thirty (30) days following publication of this notice in the **Federal Register**, EPA will publish a document that withdraws this action.
