Farm Service Agency

Title: Emergency Conservation Program and Biomass Crop Assistance Program.

OMB Control Number: 0560–0082.

Summary of Collection: The Farm Service Agency (FSA), in cooperation with the Natural Resources Conservation Service, the Forest Service, and other agencies and organizations, provides eligible producers and landowners cost-share incentives and technical assistance through several conservation and environmental programs to help farmers, ranchers, and other eligible landowners and operators conserve soil, improve water quality, develop forests, and rehabilitate farmland severely damaged by natural disasters. The authorities to collect information for this collection are found under the Agricultural Credit Act of 1978 (16 U.S.C. 2201–2205), which provides emergency funds for sharing with agricultural producers the cost of rehabilitating farmland damaged by natural disaster, and for carrying out emergency water conservation measures during periods of severe drought. FSA is also managing the Biomass Crop Assistance Program (BCAP) authorized by Section 9001 of the 2008 Farm Bill (Pub. L. 110–246) which amends Title IX of the Farm Security and Rural Investment of 2002 and adds section 9011 for BCAP. BCAP regulations outlined the legislations parameters, program definitions and process for: (1) Establishing BCAP project areas; (2) Matching payment opportunity for eligible material owners and qualifying biomass conversion facilities; (3) Contracting acreage for producers in BCAP project areas; and (4) Establishment and annual production payments for producers in BCAP projects areas.

Need and Use of the Information: FSA will collect information using several forms. The collected information will be used to determine if the person, land, and practices are eligible for participation in the respective program and to receive cost-share assistance. Information collection from eligible

biomass owners, biomass conversion facilities, and producers meeting the requirements for matching payments, annual production payment assistance, establishment payments and BCAP project area designation is necessary in order to ensure the financial accountability needed to operate and administer the BCAP. Without the information, FSA will not be able to make eligibility determinations and compute payments in a timely manner.

Number of Respondents: 70,000.

20250–7602. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling (202) 720–8958.

Food and Nutrition Service

Title: Child Nutrition Database.

OMB Control Number: 0584–0494.

Summary of Collection: The Child Nutrition (CN) Database is a necessary component in implementation of USDA's Food and Nutrition Service (FNS) National School Lunch Program (NSLP) and School Breakfast (SBP). The regulations (7 CFR 210.10) require state agencies to conduct a nutrient analysis of school lunches and breakfast as part of administrative review to monitor compliance with the specifications for certain nutrients. The CN Database provides the SFAs with the necessary nutrient information for this purpose.

Need and Use of the Information: FNS will collect information on (1) USDA commodities; (2) USDA Nutrient Database for Standard Reference food items which are used in the SBP and NSLP; (3) quantity recipes for school food service developed by USDA; and (4) brand name commercially processed foods. State agencies ability to conduct a weighted nutrient analysis of the reimbursable meals for administrative review is dependent upon availability of CN database. The information gathered for the CN Database is required to be used in software programs approved by USDA for use in meeting the nutrient standards and nutrition goals of the Child Nutrition Programs. Both the State agencies and program operators use the information for auditing and menu planning purposes. If the information is not collected or updated regularly for the CN Database, the nutrient data will become less useful to program operators, causing them to rely on their vendor for required nutritional information.

Description of Respondents: Business or other for-profit.

Number of Respondents: 32.

Frequency of Responses: Report: Other (as needed).

Total Burden Hours: 2,240.
