

Appendix

The additional information below is included to assist those who may wish to submit comments pertinent to review under the Paperwork Reduction Act:

Description of Collection

Title: Solid Waste Rail Transfer Facilities.

OMB Control Number: — —.

STB Form Number: None.

Type of Review: New Collection.

Respondents: Any applicant seeking a land-use-exemption permit, whether compelled by a Governor's petition or through its own accord.

Number of Respondents: Unknown; none mandated by the Board.

Estimated Time Per Response: 160 hours.

Frequency: 1.

Total Burden Hours (annually including all respondents): 160 hours.

Total "Non-hour Burden" Cost: An estimated cost of \$50,000 to hire an environmental consultant to work with Board staff on the required environmental report.

Needs and Uses: The information collected from applicants develops the record in land-use-exemption-permit proceedings, a process mandated by Congress in the CRA. The information gathered under the interim regulations is intended to permit the Board to accurately assess the merits of a permit application.

Retention Period: Information in this report will be maintained on the Board's Web site for a minimum of 1 year and will be otherwise maintained permanently.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 001005281-0369-02]

RIN 0648-XA264

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Closure

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS closes the hook-and-line component of the commercial sector for king mackerel in the southern Florida west coast subzone. This closure is necessary to protect the Gulf king mackerel resource.

DATES: This rule is effective 12:01 a.m., local time, March 23, 2011, through June 30, 2011.

FOR FURTHER INFORMATION CONTACT:

Steve Branstetter, telephone: 727-824-5305, fax: 727-824-5308, e-mail: Steve.Branstetter@noaa.gov.

SUPPLEMENTARY INFORMATION: The fishery for coastal migratory pelagic fish (king mackerel, Spanish mackerel, cero, cobia, little tunny, and, in the Gulf of Mexico only, dolphin and bluefish) is managed under the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic (FMP). The FMP was prepared by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and is implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

On April 27, 2000, NMFS implemented the final rule (65 FR 16336, March 28, 2000) that divided the Florida west coast subzone of the eastern zone into northern and southern subzones, and established their separate quotas. The king mackerel quota for the hook-and-line component of the commercial sector in the southern Florida west coast subzone is 520,312 lb (236,010 kg) (50 CFR 622.42(c)(1)(i)(A)(2)(i)).

Under 50 CFR 622.43(a), NMFS is required to close any segment of the king mackerel commercial sector when its quota has been reached, or is projected to be reached, by filing a notification with the Office of the Federal Register. NMFS has determined the commercial quota for Gulf group king mackerel in the southern Florida west coast subzone will be reached by March 23, 2011. Accordingly, the commercial sector for Gulf group king mackerel in the southern subzone is closed effective 12:01 a.m., local time, March 23, 2011, through June 30, 2011, the end of the fishing year.

From November 1 through March 31, the southern subzone is that part of the Florida west coast subzone off Collier and Monroe Counties, Florida. This is the area south and west from 25°20.4'N. lat. (a line directly east from the Miami-Dade/Monroe County boundary on the east coast of Florida) to 26°19.8' N. lat. (a line directly west from the Lee/Collier County boundary on the west coast of Florida). Beginning April 1, the southern subzone is reduced to the area off Collier County, Florida, between 25°48' N. lat. and 26° 19.8' N. lat.

During the closure period, no person aboard a vessel for which a commercial permit for king mackerel has been issued may fish for or retain Gulf group king mackerel in Federal waters of the

closed subzone. There is one exception, however, for a person aboard a charter vessel or headboat. A person aboard a vessel that has a valid charter/headboat permit and also has a commercial king mackerel permit for coastal migratory pelagic fish may continue to retain king mackerel in or from the closed subzone under the 2-fish daily bag limit, provided the vessel is operating as a charter vessel or headboat. Charter vessels or headboats that hold a commercial king mackerel permit are considered to be operating as a charter vessel or headboat when they carry a passenger who pays a fee or when more than three persons are aboard, including operator and crew.

Classification

This action responds to the best available information recently obtained from the fisheries. The Assistant Administrator for Fisheries, NOAA (AA), finds that the need to immediately implement this action to close the hook-and-line component of the commercial sector for king mackerel in the southern Florida west coast subzone constitutes good cause to waive the requirements to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such prior notice and opportunity for public comment is unnecessary and contrary to the public interest. Such procedures would be unnecessary because the rule implementing the quota and the associated requirement for closure of the commercial harvest when the quota is reached or projected to be reached has already been subject to notice and comment, and all that remains is to notify the public of the closure.

Allowing prior notice and opportunity for public comment on this action would be contrary to the public interest because any delay in the closure of the commercial harvest could result in the commercial quota being exceeded. There is a need to immediately implement this action to protect the king mackerel resource because the capacity of the fishing fleet allows for rapid harvest of the quota. Prior notice and opportunity for public comment would require time and would potentially result in a harvest well in excess of the established quota.

For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

This action is taken under 50 CFR 622.43(a) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 21, 2011.

Margo Schulze-Haugen,

*Acting Director, Office of Sustainable
Fisheries, National Marine Fisheries Service.*
