

prices are to be calculated on the basis of the arm's-length sales in the field or area. Should MMS revise the rule to use arm's-length reported values for production from a reservation or other designated area?

3. Should MMS collect information to use in the major portion calculations to distinguish the quality of the oil (e.g., sweet crude, sour crude, yellow wax crude, etc.)? The workshops will be open to the public in order to discuss the valuation of crude oil produced from Indian leases. We encourage members of the public to attend these meetings. Those wishing to make formal presentations should sign up to do so upon arrival. The sign-up sheet will determine the order of speakers.

Executive Order 13175 requires the Federal Government to consult and collaborate with the Indian community (tribes and individual Indian mineral owners) in the development of Federal policies that impact the Indian community. The locations of the workshops were chosen to allow for increased participation by the Indian community. In addition, MMS will send out letters to various leaders in the Indian community advising them of, and encouraging them to participate in, the workshops.

The workshops will be open to the public without advance registration. Public attendance may be limited to the space available. We encourage a workshop atmosphere, and members of the public are encouraged to participate. We will post the minutes from each workshop on our Web site at <http://www.mrm.mms.gov>. You may submit written comments to MMS following the workshops by regular mail to P.O. Box 25165, MS 396B2, Denver, Colorado 80225-0165, by e-mail to John.Barder@mms.gov, or through our Internet public comment system at <http://occonnect.mms.gov>.
