SUPPLEMENTARY INFORMATION:

Title: Timber Sale Contract Operations and Administration.

OMB Number: 0596-0225.

Expiration Date of Approval: March 31, 2025.

Type of Request: Extension with Revision.

Abstract: Forest Service contracts for the sale of timber and other forest products are bilateral contracts in which both contracting parties are bound to fulfill obligations reciprocally. By their nature, bilateral contracts require both parties to routinely share information and enter into agreements pertaining to operations and performance. Some information collected under Forest Service contracts is required by laws, regulations, and/or timber sale policies. Each contract specifies information the contractor will be required to provide, including the timing and frequency of the information collection.

The type and amount of information collected varies depending on the size, complexity, and length of each contract, and external factors such as weather and market conditions. The information collected includes plans, requests, agreements, and notices necessary for operations under the terms of the contracts. Forest Service officers collect the information from contractors who may be individuals, private sector businesses, or other government entities. The information is submitted in a variety of formats including Forest Service forms, Government Standard and/or Common Forms, forms developed by individual contractors, charts, maps, email messages, facsimiles, and letters. Also, to assist small contractors and lessen their burden, individual Contracting Officers may provide optional forms for some of the information collected.

Depending on the purpose of the specific information collection, the information may be submitted by electronic mail, facsimile, conventional mail, document signing software or hand delivery. The information is needed by the Agency for a variety of uses associated with the operations and administration of contracts for the sale

of timber and other forest products, in order to: (1) Plan and schedule contract administration workloads, (2) plan and schedule the delivery of government furnished materials needed by contractors, (3) assure the safety of the public in the vicinity of contract work, (4) identify contractor resources that may be used in emergency fire-fighting situations, (5) determine contractor eligibility for additional contract time, (6) determine contractor eligibility for re-determining contract rates, (7) monitor compliance with domestic processing requirements, (8) process agreements and modifications, (9) properly process payment bonds, (10) obtaining purchaser or contractor's consent to conduct business electronically.
