Pacific Halibut Fisheries of the West Coast; 2024 Catch Sharing Plan and Recreational Fishery Management Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to approve changes to the Pacific Halibut Catch Sharing Plan for the International Pacific Halibut Commission’s regulatory Area 2A off Washington, Oregon, and California. In addition, NMFS proposes to implement new management measures for the 2024 recreational fisheries in Area 2A that are not implemented through the International Pacific Halibut Commission (IPHC). These measures include the recreational fishery seasons and subarea allocations for Area 2A. This action would also add a new inseason management provision to transfer anticipated uncaught recreational fishery allocation between states. Additionally, this action proposes to establish a new management line at Point Arena, CA, creating two subareas with separate allocations off California. These actions are intended to conserve Pacific halibut and provide angler opportunity where available.
