Abstract: The USGS administers the National Ground-Water Monitoring Network which was developed through work with the Federal Advisory Committee on Water Information (ACWI) and its Subcommittee on Ground Water (SOGW). This network is required as part of Public Law 111-11, Subtitle F-Secure Water: Section 9507, 42 U.S.C. 10367, "Water Data Enhancement by United States Geological Survey." The NGWMN consists of an aggregation of wells and spring from existing Federal, State, Tribal, and local groundwater monitoring networks. To support data providers for the NGWMN, the USGS will be providing funding through cooperative agreements to water-resource agencies that collect groundwater data. The USGS will be soliciting applications for funding that will request information from the Agency collecting the data. Elements will include contact information (phone number and email address), and a proposal describing their proposed work in support of the NGWMN. The proposal will describe the groundwater networks to be included in the NGWMN, the purpose of the networks, and the Principal aquifers that are monitored. Proposals may include work to become a new data provider to the NGWMN, support for maintaining connections to agency databases, and work to enhance NGWMN sites (updating metadata, well maintenance, well drilling, and support for continuous water-level monitoring equipment). The proposal would require estimates of costs to complete the above tasks and a timeline for planned completion. The proposal will be reviewed by the USGS and the NGWMN Program Board who will make funding recommendations.
