**Proposed Project:** Attitudes Toward Electronic Health Information Exchange and Associated Privacy and Security Aspects—OMB No. 0990-NEW—Office of the National Coordinator for Health Information Technology.

**Abstract:** Electronic health information exchange promises an array of potential benefits for individuals and the U.S. health care system through improved health care quality, safety, and efficiency. At the same time, this environment also poses new challenges and opportunities for protecting health information. Health information technology and electronic health information exchange may also provide individuals with new, more effective methods to engage with their health care providers and affect how their health information may be exchanged. Based on findings from a comprehensive literature review, little is known about individuals' attitudes toward electronic health information exchange and the extent to which they are interested in determining by whom and how their health information is exchanged. The proposed information collection will permit us to better understand individuals' attitudes toward electronic health information exchange and its associated privacy and security aspects as well as inform policy and programmatic objectives.

The Office of the National Coordinator for Health Information Technology (ONC) is proposing to conduct a nationwide survey which will use computer-assisted telephone interviews (CATI) to interview a representative sample of the general U.S. population. Data collection will take place over the course of eight weeks. The data will be analyzed using statistical methods and a draft report will be prepared. ONC will hold a web seminar prior to the publication of the final report to convey the findings to the general public. A final report will be posted on <http://healthit.hhs.gov> which will include the results and analysis.

**Proposed Project:** HHS 42 CFR part 50, subpart B; Sterilization of Persons in Federally Assisted Family Planning Projects—OMB No. 0937-0166—Revision—Office of Population Affairs—Office of Family Planning.

**Abstract:** This is a request for revision of a currently approved collection for the disclosure and record-keeping requirements codified at 42 CFR part 50, subpart B ("Sterilization of Persons in Federally Assisted Family Planning Projects"). The consent form solicits

information to assure voluntary and informed consent to persons undergoing sterilization in programs of health services which are supported by Federal financial assistance administered by the Public Health Service (PHS). The form provides additional procedural protections to individuals undergoing sterilization. In order to obtain informed consent, the regulation requires that programs use either the form that is appended to the PHS regulation or another consent form approved by the Secretary.

In 2003, the sterilization consent form was revised to conform to OMB government-wide standards for the collection of race/ethnicity data and to incorporate the PRA burden statement as part of the consent form. The current form has been updated to conform to the changed name of a federal entitlement program. The program, Aid to Families with Dependent Children (AFDC), utilized by low-income families with dependent children who need federal assistance, has been replaced by a different program with similar aims, Temporary Assistance for Needy Families (TANF). Consequently, the reference to AFDC in the first paragraph has been replaced with a reference to TANF.
