

are identified, and then the mutation-reactive TCRs and engineered peripheral blood T cells from the same patient are isolated to express these mutation-reactive TCRs. These personalized TCR engineered T cells are expanded and infused back into the same patient with the potential to induce tumor regression.

The prospective exclusive license may be granted unless within thirty (30) days from the date of this published notice, the NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Complete applications for a license in the field of use filed in response to this notice will be treated as objections to the grant of the contemplated exclusive license. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.
