SUPPLEMENTARY INFORMATION:

Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM, and under

5 U.S.C. 553(d)(3), good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Information was made available to the Coast Guard in insufficient time to publish an NPRM or for Publication in the **Federal Register**. Publishing an NPRM and delaying its effective date would be contrary to public interest since immediate action is needed to protect construction personnel, equipment, and vessels from potential safety hazards associated with vessels transiting in this area.

Request for Comments

Although the Coast Guard has good cause in implementing this rule without engaging in the notice of proposed rule making process, we want to afford the maritime community the opportunity to participate in this rulemaking by submitting comments and related material regarding the size and boundaries of the regulated navigation area in order to minimize unnecessary burdens. If you do so, please include your name and address, identify the docket number for this rulemaking, CCGD8-02-015, indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know they reached us, please enclose a stamped self addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this temporary final rule in view of them.

Construction of the bendway weirs is needed to maintain the integrity of the right descending bank.
