Policy Justification

Philippines—AIM-9X Sidewinder Block II Tactical Missiles

The Government of the Philippines has requested to buy twenty-four (24) AIM-9X Sidewinder Block II tactical missiles; twenty-four (24) AIM-9X Block II Captive Air Training Missiles (CATMs); six (6) Tactical Guidance Units; and ten (10) Captive Air Training Missile (CATM) Guidance Units. Also included are containers, support and test equipment, spare and repair parts, personnel training and training equipment, publications and technical data, software delivery and support, U.S. Government and contractor technical assistance and other related support; and other related elements of logistical and program support. The estimated total cost is \$42.4 million.

This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a strategic partner that continues to be an important force for political stability, peace, and economic progress in South East Asia.

The proposed sale will improve the Philippines' capability to meet current and future threats by enabling the Philippines to deploy fighter aircraft with a short range air-to-air missile defense capability. The Philippines Air Force is modernizing its fighter aircraft to better support its own air defense and maritime security needs. The Philippines will have no difficulty

absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Raytheon Missile Systems Company, Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require travel of U.S. Government or contractor representatives to the Philippines on a temporary basis for program technical support and management oversight.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21-23

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AIM-9X Block II Sidewinder Missile represents a substantial increase in missile acquisition and kinematics performance over the AIM-9M and replaces the AIM-9X Block I Missile configuration. The missile includes a high off-boresight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe and the ability to integrate the Helmet Mounted Cueing System. The software algorithms are the most sensitive portion of the AIM-9X missile. The software continues to be modified via a pre-planned product improvement (P3I) program in order to improve its counter-countermeasure capabilities. No software source code or algorithms will be released.

2. The highest level of classification of defense articles, components, and services included in this potential sale is CONFIDENTIAL.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Philippines can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of the Philippines.
