SUPPLEMENTARY INFORMATION:

Abstract of Patent Application(s)

An apparatus and method of presenting air traffic data to an air traffic controller are provided. Air traffic data including a two-dimensional spatial location and altitude for a plurality of aircraft is received. A disparity value is determined based on the altitude for each aircraft of the plurality of aircraft. Left and right eye images are generated of the plurality of aircraft where at least one of the left and right eye images is based on the determined disparity value. The left and right eye images are simultaneously displayed to the air traffic controller on a display. The simultaneously displayed images provide an apparent three-dimensional separation of each of the aircraft of the plurality of aircraft on the display.

Intellectual Property

U.S. Patent No. 9,667,947 B2, issued on May 30, 2017, and entitled “Stereoscopic 3-D Presentation for Air Traffic Control Digital Radar Displays.”

The Department of the Air Force may grant the prospective license unless a timely objection is received that sufficiently shows the grant of the license would be inconsistent with the Bayh-Dole Act or implementing regulations. A competing application for a patent license agreement, completed in compliance with 37 CFR 404.8 and received by the Air Force within the period for timely objections, will be treated as an objection and may be
