SUPPLEMENTARY INFORMATION:

Title: Classical Swine Fever; Importation of Pork and Pork Products and Live Swine from the Mexican States of Baja California, Baja California Sur, Chihuahua, and Sinaloa.

OMB Number: 0579-0230.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301-8317), the Animal and Plant Health Inspection Service, U.S. Department of Agriculture, regulates the importation of animals and animals products into the United States to prevent the introduction of animal diseases, such as classical swine fever (CSF), into the United States.

The regulations in 9 CFR part 94 allow the importation of pork and products and live swine from the Mexican States of Baja California, Baja California Sur, Chihuahua, and Sinaloa under conditions designed to ensure that the pork and pork products and live swine will not transmit CSF. This disease is not present in those States but exists in other parts of Mexico. The conditions for importation require, among other things, certification from a full-time salaried veterinary officer of the Government of Mexico that the pork or pork products or live swine originated in a CSF-free region and have not been commingled with swine or pork or pork products from CSF-affected regions.

We are asking the Office of Management and Budget (OMB) to approve our use of this information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our

information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1 hour per response.

Respondents: Federal animal health authorities in Mexico.

Estimated annual number of respondents: 5.

Estimated annual number of responses per respondent: 10.

Estimated annual number of responses: 50.

Estimated total annual burden on respondents: 50 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
