National Environmental Policy Act Compliance

The proposed issuance of a permit amendment triggers the need for compliance with the National Environmental Policy Act of 1969, as amended (NEPA; 42 U.S.C. 4321 *et seq.*). The draft EA was prepared to analyze the impacts of issuing an amended ITP based on the draft amended HCP; to inform the public of the proposed action, any alternatives, and associated impacts; and to disclose any irreversible commitments of resources. The draft EA tiers from the analysis within the final environmental impact statement issued by the Service and noticed to the public on December 8, 2014 (79 FR 72696).

Proposed Action

The proposed action includes amendments to the existing permit and HCP to include:

1. The addition of Kern mallow to the five species that are covered by the HCP and permit, and inclusion of additional species-specific minimization measures.
2. An extension of the permit term from 35 years to 50 years.
3. The removal of 489.9 ac of potential solar site development area that would reduce the permit area to 5,318.4 ac.
4. The inclusion of the installation and operation of battery energy storage systems as part of the project.
