

regarding information needed by Campaign audiences as well as their attitudes and behaviors related to COVID-19 and the COVID-19 vaccines. These will be used to inform the development of Campaign messages and strategy.

Copy Testing Surveys

Prior to placing Campaign advertisements in market, ASPA will conduct copy testing surveys to ensure the final Campaign messages have the intended effect on target attitudes and behaviors. Copy testing surveys will be

conducted with sample members who comprise the target audiences; these surveys will assess perceived effectiveness of the advertisements as well as the effect of exposure to an ad on key attitudes and behavioral intentions. The results from these surveys will be used internally by ASPA to inform decisions on Campaign messages and materials; for example, to identify revisions to the materials or determine which advertisement to move to market.

Need and Proposed Use: In light of the current COVID-19 crisis, this

information is needed given the impact of the pandemic on the nation. The Secretary of the Department of Health and Human Services (HHS) has declared a public health emergency effective January 27, 2020, under section 319 of the Public Health Service Act (42 U.S.C. 247d [1]) and renewed it continually since its issuance (see links to the determination here and here). Additionally, in accordance with 5 CFR 1320.13, HHS previously requested emergency submissions (sections 1320 (a)(2)(ii) and (2)(iii) of the federal regulations.
