#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This is a request for authorization to collect information under the NASA Federal Acquisition Regulation Supplement (NFS) Clause, 1852.223-70, Safety and Health Measures and Mishap Reporting, formerly entitled "Safety and Health." While the clause is proposed to be revised to eliminate some information collected requirements, two distinct information collection requirements will remain (1) notification of a Type A, B, C, or D Mishap, or a close call as defined in NASA Procedural Requirements (NPR) 8621.1 Mishap and Close Call Reporting, Investigating and Recordkeeping, and (2) quarterly reports specifying lost-time frequency rate, number of lost-time injuries, exposure, and accident/incident dollar losses.

##### II. Methods of Collection

Electronic.

##### III. Data

Title: Safety and Health Measures and Mishap Reporting.

OMB Number: 2700-0160.

Type of review: Renewal.

NSF clause 1852.223-70, Safety and health measures and mishap reporting. Under this clause, NASA contractors are to immediately notify the contracting officer when a mishap (Type A, B, C, D or Close Call) occurs. The data the contractors provide to NASA includes incident location, date and time of incident, number of fatalities if known, number of hospitalized employees if known, type of injury if known, type of damage if known, contact person, contact person phone, number, and brief description of the incident.

NASA estimates that the notification of a mishap will take a contractor approximately 4 hours, counting initial notifications, supervisory notifications, and contracting officer notifications.
