The analysis conducted since the last FYR indicates that the remedy has been fully implemented and the remedial action objectives and related cleanup levels have been attained. No hazardous substances, pollutants or contaminants remain above levels that could prevent unlimited use and unrestricted exposure. Therefore, no further five-year reviews are required.

Community Involvement

Public participation activities have been satisfied as required in CERCLA Section 113(k), 42 U.S.C. 9613(k) and CERCLA Section 117, 42 U.S.C. 9617. Throughout the remedial process, the EPA has kept the public informed of activities being conducted at the Site by way of informational meetings, fact sheets and public meetings.

Documents in the deletion docket which the EPA relied on for the recommendation for deletion from the NPL are available to the public in the information repositories identified previously. A notice of availability of the Notice of Intent for Deletion has been published in *The Columbian*.

Determination That the Site Meets the Criteria for Deletion in the NCP

The EPA, with concurrence of the State of Washington through the Department of Ecology, has determined that the implemented remedy achieves the degree of cleanup or protection specified in the ROD for all pathways of exposure. All selected remedial and removal action objectives and associated cleanup levels are consistent with agency policy and guidance. No further Superfund response is needed to protect human health and the environment.

In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where all appropriate response actions have been implemented and where no further response is appropriate. Consistent with this, the EPA is proposing deletion of this Site from the NPL.
