

women and men in scientific and engineering positions.”

NCSES has historically met these legislative mandates through its suite of surveys and biennial publications that measure the education, employment, and demographic characteristics of the nation’s college-educated scientists and engineers. However, an emerging research and policy interest in the STW creates a need for new data to expand and supplement NCSES’s efforts on the college-educated science and engineering workforce.

Expected Respondents: All previous respondents to the 2018 American Community Survey, collected by the U.S. Census Bureau, are eligible to be selected to participate in the initial NTEWS. Approximately 40,000 adults, ages 16–75 and not enrolled in high school, will be selected for the NTEWS sample. The NTEWS sample design will meet the needs of both NCSES and NCES by providing coverage of the workforce-eligible adult population and including an oversample of adults who are in skilled technical occupations.

Estimate of Burden: The expected response rate is 62.5 percent, or 25,000 completed cases. The amount of time to complete the survey may vary depending on an individual’s circumstances and the mode of the collection (web, paper, or telephone). NCSES estimates an average completion time of 15 minutes. NCSES estimates that the average annual burden for the initial NTEWS over the course of the three-year OMB clearance period will be no more than 2,084 hours [(25,000 completed cases × 15 minutes)/3 years].

Comments: Comments are invited on (a) aspects of the data collection effort (including, but not limited to, the following: The availability of administrative and supplemental sources of data on the skilled technical workforce, survey content, contact strategy, and statistical methods); (b) whether the proposed collection of information is necessary for the proper performance of the functions of NCSES, including whether the information shall have practical utility; (c) the accuracy of the NCSES’s estimate of the burden of the proposed collection of information; (d) ways to enhance the quality, use, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: April 13, 2020.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes: Meeting Notice

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of Meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) will convene a teleconference meeting of the Advisory Committee on the Medical Uses of Isotopes (ACMUI) on April 30, 2020, to discuss the draft recommendations of the ACMUI COVID–19 Subcommittee. The ACMUI subcommittee’s recommendations will include its review of the impact of COVID–19 on the medical use community and potential regulatory relief measures as it relates to the medical uses of radioactive material. Meeting information, including a copy of the agenda and handouts, will be available at <https://www.nrc.gov/reading-rm/doc-collections/acmui/meetings/2020.html>. The agenda and handouts may also be obtained by contacting Ms. Kellee Jamerson using the information below.

DATES: The teleconference meeting will be held on Thursday, April 30, 2020, 2:00 p.m. to 4:00 p.m. Eastern Time.

Public Participation: Any member of the public who wishes to participate in the teleconference should contact Ms. Jamerson using the contact information below.
