2002 Reporting Notice; Partial Updating of Inventory Data Base; Production and Site Reports

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This document announces the 2002 reporting period for the Toxic Substances Control Act (TSCA) Inventory Update Rule (IUR). The IUR requires manufacturers and importers of certain chemical substances included on the TSCA Chemical Substance Inventory to report current data on the production volume, plant site, and site-limited status of the substances. The 2002 reporting period is from August 26, 2002 to December 23, 2002. While chemical identifiers, such as Premanufacturing Notice (PMN) numbers, original inventory form numbers, and bona fide numbers are

permitted under 40 CFR part 710, to facilitate the compilation and timely release of the 2002 IUR data base, the Agency strongly encourages industry to report their chemicals by the Chemical Abstracts Service (CAS) or accession number only.

DATES: This document is effective April 16, 2002. The 2002 reporting period is from August 26, 2002 to December 23, 2002.

FOR FURTHER INFORMATION CONTACT: For general information contact: Barbara Cunningham, Acting Director, Environmental Assistance Division (7408M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 554-1404; e-mail address: TSCA-Hotline@epa.gov.

Potentially affected categories and entities may include, but are not limited to:

Categories	Examples of potentially affected entities

II. Background

A. What Action is the Agency Taking?

The Agency is announcing the 2002 reporting period for the Toxic Substances Control Act (TSCA) Inventory Update Rule (IUR). The IUR requires manufacturers and importers of certain chemical substances included on the TSCA Chemical Substance Inventory to report current data on the production volume, plant site, and site-limited status of the substances. The 2002 reporting period is from August 26, 2002 to December 23, 2002.

The Agency received comments that several of the 1998 submitters were concerned about the processing time of submissions received. Analysis of the 1998 reporting cycle indicated that significant Agency resources were expended identifying and correcting misidentified CAS and/or accession numbers as well as identifying CAS registry numbers or accession numbers for chemicals reported using other identifiers i.e., PMN, TME, bona fide, original inventory form numbers. Therefore, in order to facilitate timely processing of 2002 submissions, the Agency strongly recommends that submitters report chemical identification as either CAS or accession number. If a submitter experiences difficulty in the identification of the appropriate CAS or accession number, the technical contact person identified under **FOR FURTHER INFORMATION CONTACT** can provide assistance.
