SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for a new collection of information.

For decades, the National Weather Service (NWS) has provided deterministic (*i.e.*, single-value) snowfall forecasts or snowfall uncertainty forecasts with set, narrow ranges (*i.e.*, 2-4, 4-6 inches). More recent advancements in model ensembles have allowed for the calculation of probabilistic snowfall information. This forecast information can be messaged in a number of ways, for example, as the probability a location will receive some amount of snowfall, or as the probability the snowfall will be within a certain range. While statistically more accurate, it is unknown if probabilistic snowfall forecasts are understood or helpful to the end user in their decision making process.

The NWS and National Center for Atmospheric Research will work together to conduct a survey across the NWS Central Region to determine different core partners' needs, preferences, understanding, and usefulness regarding probabilistic snow forecasts. Core partners of interest for

this effort are emergency managers, school officials, and transportation officials. The survey will be hosted as a web-based survey through QuestionPro and will be electronically distributed to core partners by local NWS forecast offices across the Central Region in early 2022.

Results from this survey will be used to determine how probabilistic snowfall information will be used in future NWS products and services with the ultimate goal of providing information in a way that improves core partners' ability to make informed decisions for the protection of life and property.

II. Method of Collection

We will program and field the survey as web-based, using QuestionPro. All NWS Weather Forecast Offices (WFOs) in the Central Region will be invited to send the survey via email to their emergency management, transportation, and school partners. A short invitation script will be provided to all WFO Warning Coordination Meteorologists to send the survey. The survey will remain open for three weeks, and we will ask WCMs to send one reminder halfway through that period (*i.e.*, after 10 days).

Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.¹

Title: Rules Relating to Review of National Futures Association Decisions in Disciplinary, Membership Denial, Registration, and Member Responsibility Actions (OMB Control No. 3038–0043). This is a request for extension of a currently approved information collection.

Abstract: 17 CFR part 171 rules require a registered futures association to provide fair and orderly procedures for membership and disciplinary

actions. The Commission’s review of decisions of registered futures associations in disciplinary, membership denial, registration, and member responsibility actions is governed by Section 17(h)(2) of the Commodity Exchange Act, 7 U.S.C. 21(h)(2). The rules establish procedures and standards for Commission review of such actions, and the reporting requirements included in the procedural rules are either directly required by Section 17 of the Commodity Exchange Act or are necessary to the type of appellate review role Congress intended the Commission to undertake when it adopted that provision.

With respect to the collection of information, the CFTC invites comments on:

- Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;

- The accuracy of the Commission’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and

- Ways to minimize the burden of collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.

You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according to the procedures established in § 145.9 of the Commission’s regulations.²

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from <https://www.cftc.gov> that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the Information Collection Request will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.
