## II. Background

A. What Action Is the Agency Taking?

The Agency has recently completed impact assessments on endosulfan for the following eight crops: Apple, cotton, cucumber, melon, potato, pumpkin, squash, and tomato.

The impact assessments evaluate the impacts on growers that could result from various risk management options, such as cancellation of uses and longer Restricted Entry Intervals (REIs). All stakeholders are encouraged to comment on these assessments, submit additional information for the Agency to consider, and provide data with which the Agency can better define the likely impacts. The impact assessments are available in the electronic docket at <a href="http://www.regulations.gov">http://www.regulations.gov</a> under docket ID number EPA-HQ-OPP-2002-0262.

The Agency chose to assess apple, cotton, cucumber, melon, potato, pumpkin, squash, and tomato because they are crops for which endosulfan use is more prevalent (when compared to other crops on which endosulfan is used), and because the Agency received

public comments on several of these crops in response to its 2007 usage analysis available at regulations.gov under docket ID number EPA-HQ-OPP-2002-0262-0063. With regard to the 2007 usage analysis, the Agency received and considered comments from various stakeholders concerning apple, cherry, cotton, peach, pear, potato, cucurbit, pepper, tomato, Christmas tree, macadamia nut, and pineapple uses of endosulfan. The Agency also received but did not consider comments from stakeholders regarding grape and green bean uses of endosulfan because these uses were cancelled as a result of the 2002 Reregistration Eligibility Decision (RED).

In addition to comments on the eight impact assessments, the Agency requests that stakeholders provide any additional information they may have on the importance of endosulfan use in agriculture. In particular, since publishing the 2007 usage analysis, the Agency has not received any comments suggesting that use of endosulfan is important for the following crops:

- Almond,
- Apricot,
- Blueberry,
- Broccoli,
- Brussels spouts,
- Cabbage,
- Carrots,
- Cauliflower,
- Celery,
- Citrus (nonbearing trees and nursery stock),
  - Collard greens,
- Crops grown for seed (alfalfa, cabbage, collard greens, cucumber, kale, kohlrabi, melons, pumpkin, radish, rutabaga, squash, turnip),
  - Dry beans,
  - Dry peas,
  - Eggplant,
  - Filbert,
  - Kale,
  - Lettuce,
  - Mustard greens,
  - Nectarine,
- Ornamental trees, Shrubs, and Woody plants,
  - Plum and Prune,
  - Sweet corn.
  - Sweet potato,
  - Strawberry,
  - Tobacco,
  - Turnip, and
  - Walnut.

When commenting on the eight impact assessments and the importance of endosulfan use on the crops listed above, stakeholders may want to consider the following questions:

1. What additional usage information is available to supplement the 2007 and 2009 analyses?

- 2. What effect would extended REIs or other risk management measures have on the ability of growers to perform necessary post-application activities?
- 3. For what crops and against what pests is the use of endosulfan critical, and why?
- 4. Are there any local or niche uses of endosulfan that are critical, and why?
- 5. What alternatives are available for control of the pests targeted by endosulfan?

In the April 29, 2009 issue of the **Federal Register**, the Agency published a separate Notice to solicit comments on petitions from the National Resources Defense Council and the Pesticide Action Network North America requesting that EPA cancel all uses of endosulfan. Please see docket ID number EPA-HQ-OPP-2008-0615 (FRL-8410-2) in regulations.gov to access the petitions and related documents, as well as to submit comments on the petitioners' requests to cancel all uses of endosulfan.

The Agency asks that comments on the Agency's eight impact assessments and any additional information on the importance of endosulfan use in agriculture be submitted to docket number EPA–HQ–OPP–2002–0262 within 60 days.

B. What Is the Agency's Authority for Taking This Action?

This action is taken under authority of FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3).
