#### SUPPLEMENTARY INFORMATION:

## I. Abstract

Marine recreational anglers are surveyed for catch and effort data, fish biology data, and angler socioeconomic characteristics. These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), as amended, regarding conservation and management of fishery resources.

## II. Method of Collection

A random-digit-dialing telephone survey of coastal zone households collects data on the proportion of marine fishing households and the number of shore and private/rental boat fishing trips by residents of those households. A directory telephone survey of boat operators collects data on the numbers of angler fishing trips on party and charter boats. On-site intercept interviews of marine recreational anglers collect data on the catch per trip by species. Supplemental surveys collect economic data about marine recreational fishing.
