SUPPLEMENTARY INFORMATION:

Background

To provide expanded notice and transparency to the public, the

Department of Homeland Security (DHS), U.S. Customs and Border Protection (CBP) published a Privacy Act system of records notice (SORN) in the **Federal Register** regarding the Automated Targeting System (ATS) on November 2, 2006 (71 Fed. Reg. 64543). As detailed in the SORN, ATS is the enforcement screening module associated with the Treasury Enforcement Communications System and was previously covered by the Treasury Enforcement Communications System "System of Records Notice." This system of records is subject to the Privacy Act of 1974, as amended (5 U.S.C. 552a).

The DHS Privacy Office published the Privacy Impact Assessment (PIA) for ATS on November 24, 2006 on its Web site, www.dhs.gov/privacy under "Privacy Impact Assessments." The PIA provides additional background information and context for the SORN, including specific information on measures taken by DHS to protect the privacy of persons whose information might be found in ATS.

The SORN referenced above did not identify or create any new collection of information; rather DHS merely provided additional notice and transparency of the functionality of these pre-existing systems. The SORN provided for a thirty day comment period which expired on December 4, 2006.

Extension of Comment Period

In response to the SORN published in the **Federal Register**, and the PIA published on the web, DHS has received a number of comments from the public requesting an extension of the comment period. DHS has decided to grant the request for the extension. Accordingly, the period of time for the submission of comments is being extended. Comments are now due on or before December 29, 2006.

Dated: December 4, 2006.

Hugo Teufel III,
Chief Privacy Officer.

Proposed Action

To continue to meet America's 21st century maritime threats and challenges, the Coast Guard initiated the Integrated Deepwater System program, the largest and most innovative acquisition in the Coast Guard's history. The IDS will contribute to the Coast Guard's maritime domain awareness, as well as the improved ability to

intercept, engage, and deter those activities that pose a direct challenge/threat to U.S. sovereignty and security. IDS will provide the means to extend our layered maritime defenses from our ports and coastal areas to hundreds of miles out to sea.

As part of the IDS program, the Coast Guard proposes a NSC homeporting plan that entails homeporting four NSCs, some pier improvements and a new administrative building at CGI in Alameda, California. The four NSCs would replace, on a one-for-one basis, the four aging 378-foot High-Endurance Cutters (WHECs) currently stationed in Alameda.

To accommodate the vessels and crew, in addition to the proposed homeporting, improvements to the existing waterfront pier and construction of a new administration building would be required at the existing base to provide adequate shore-side support.

Draft Environmental Assessment

We have prepared a draft EA. The draft EA identifies and examines the reasonable alternatives and assesses their potential environmental impact. The draft EA evaluates the potential direct, indirect and cumulative impacts associated with the NSC homeporting plan. The draft EA tiers from the USCG's Final PEIS for the IDS Program (see notice of availability, 67 FR 15275, Mar. 29, 2002).

Our preferred alternative is to homeport the four NSCs into an area where the necessary shore side infrastructure and port environment already exists to support this class and number of vessels. The existing base on CGI provides the shore support necessary to meet the logistical requirements of the four NSCs. This existing support includes secure facilities, easy access for Coast Guard personnel, administrative and support buildings and services, and required shore ties to service in-port cutters.

We are requesting your comments on the draft EA including environmental impacts and resources analyzed in the draft EA or possible sources of data or information not included in the draft EA. Your comments will be considered in preparing the final EA.

Dated: December 5, 2006.

Joseph E. Mihelic,
Chief of Deepwater Transition Management.
