FOR FURTHER INFORMATION CONTACT: Tannika Engelhard at the above U.S. Fish and Wildlife Service Office, Austin, TX.

SUPPLEMENTARY INFORMATION: Section 9 of the Act prohibits the "taking" of endangered species such as the Houston toad. However, the Service, under limited circumstances, may issue permits to take endangered wildlife species incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for endangered species are at 50 CFR 17.22.

Applicant

Paula Hanks and Jason Sims plan to construct one single family residence on 0.5 acres of the 7.6-acre Lot 20, Section 2 in the Circle D Country Acres Subdivision, Bastrop County, Texas. This action will eliminate less than one acre of habitat and result in an unquantifiable amount of indirect impact. The applicants propose to compensate for this incidental take of the Houston Toad by providing \$1,500.00 to the National Fish and Wildlife Foundation for the specific purpose of land acquisition and management within Houston toad habitat, as identified by the Service.

Alternatives to this action were rejected because not developing the subject property with federally listed species present was not economically feasible and alteration of the project design would not alter the level of impacts.

Geoffrey L. Haskett,

*Acting Regional Director, Region 2,

Notice of Intent To Revise the Nellis Air Force Range Resource Plan and Prepare a New Environmental Impact Statement

AGENCY: Department of the Interior, Bureau of Land Management in cooperation with the Department of Defense, Nellis Air Force Base and the United States Fish and Wildlife Service.

ACTION: Notice of Intent. The Bureau of Land Management is proposing to revise the existing Nellis Air Force Range Resource Plan based on specific direction within Public Law 106-65, section 3014. The BLM will include an amendment to the Tonopah Resource Management Plan which will prescribe management of the lands identified for return to public land management, all in one action.

SUMMARY: New issues have surfaced which require additional analysis to determine the best use of the existing resources. New issues include: (1) The Nellis Range is located in the serious non-attainment for PM 10 and Carbon Monoxide; (2) management of the Wild Horses on the range has caused much controversy over the past 10 years; (3) approximately 30,000 acres may be returned to public land management status provided it is hazardous materials free. The Bureau is interested in other issues the public will present as part of the record.

Due to an accelerated timeline set forth by Congress and the President, for completion of this revised Nellis Range Resource Plan, October 5, 2001, the BLM will ensure the process proceeds as quickly as possible.

COOPERATING AGENCY STATUS: This plan revision is being completed in full cooperation with the United States Fish and Wildlife Service and the Department of Defense. Based on other express interest by other State and Federal agencies as well as all three county's affected by this action, we anticipate additional interest in cooperating agency status. We will either wait until the Notice of Availability is sent to identify those additional cooperators or issue a separate **Federal Register** notice in the next 2 to 3 months.
