

All participants are also limited to a maximum of 500 hooks onboard the vessel with on a shark research fishery trip. A **Federal Register** notice describing the specific objectives for the shark research fishery in 2018 and requesting applications from interested and eligible shark fishermen is expected to publish in the near future. NMFS requests public comment regarding NMFS' intent to issue shark research fishery permits in 2018 during the comment period of this notice.

The authorized number of species for 2017, as well as the number of specimens collected in 2016, is summarized in Table 1. The number of specimens collected in 2017 will be available when all 2017 interim and annual reports are submitted to NMFS. In 2016, the number of specimens collected was less than the number of authorized specimens for all permit types, other than SRPs issued for shark research.

In all cases, mortality associated with an EFPs, SRPs, or display permits (except for larvae) is counted against the appropriate quota. NMFS issued a total of 39 EFPs, SRPs, display permits, and LOAs in 2016 for the collection of HMS and a total of 5 shark research fishery permits. As of October 3, 2017, NMFS has issued a total of 33 EFPs, SRPs, display permits, and LOAs and a total of 5 shark research fishery permits.

TABLE 1—SUMMARY OF HMS EXEMPTED FISHING PERMITS ISSUED IN 2016 AND 2017, OTHER THAN SHARK RESEARCH FISHERY PERMITS

["HMS" refers to multiple species being collected under a given permit type.]

*LOAs are issued for bona fide scientific research activities involving non-ATCA managed species (e.g., most species of sharks). Collections made under an LOA are not authorized; rather this estimated harvest for research is acknowledged by NMFS. Permittees are encouraged to report all fishing activities in a timely manner.

**Atlantic HMS larvae were authorized for collection but no limit on the number of larvae were set.

Final decisions on the issuance of any EFPs, SRPs, display permits, and shark research fishery permits will depend on the submission of all required information about the proposed activities, NMFS' review of public comments received on this notice, an applicant's reporting history on past permits, if vessels or applicants were issued any prior violations of marine resource laws administered by NOAA, consistency with relevant NEPA documents, and any consultations with appropriate Regional Fishery Management Councils, states, or Federal agencies. NMFS does not anticipate any significant environmental impacts from the issuance of these EFPs as assessed in the 1999 FMP, the 2006 Consolidated HMS FMP and its amendments, the Environmental Assessment for the 2012 Swordfish Specifications, and the Environmental Assessment for the 2015 Final Bluefin Tuna Quota and Atlantic Tuna Fisheries Management Measures.
