SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through January 31, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on March 10, 2023, during a 60-day comment period (88 FR 15019). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: This ICR covers the information collection activities associated with the prohibitions and restrictions on the following five chemical substances: decabromodiphenyl ether (decaBDE) (Chemical Abstract Services Number (CASRN) 1163-19-5), phenol, isopropylated phosphate (3:1) (PIP (3:1)) (CASRN 68937-41-7), 2,4,6-tris(tert-butyl)phenol (2,4,6-TTBP) (CASRN 732-26-3), pentachlorothiophenol (PCTP) (CASRN 133-49-3), and

hexachlorobutadiene (HCBD) (CASRN 87-68-3).

Form Numbers: None.

Respondents/affected entities: Entities potentially affected are those that manufacture, process, distribute in commerce or use decaBDE, PIP (3:1), 2,4,6-TTBP, PCTP, HCBD, or products or articles containing these chemicals.

Respondent's obligation to respond: Mandatory (40 CFR 751).

Estimated number of respondents: 73 (total).

Frequency of response: On occasion.

Total estimated burden: 54 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated costs: \$4,287 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is a decrease of 34 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to EPA's updating of burden estimates for these chemicals under the rule. This change is an adjustment. It results from the fact that some firms are no longer expected to incur recordkeeping and downstream notification costs since they are prohibited from using the chemical(s) during the period this ICR covers.

Director, Information Engagement Division.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through January 31, 2024. An agency may neither conduct nor sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested, via the **Federal Register** on July 22, 2023, during a 60-day comment period (88 FR 31748). The notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov, or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. Abstract: Information collected as part of this information collection request (ICR) is used to issue operating permits and manage the CAM program. The operating permit program requires owners or operators of units that emit air pollutants to submit annual compliance certifications and monitoring results at least semi-annually, and to report deviations promptly, but no implementation guidance is provided within the operating permit program. The CAM program ensures sources that use active air emission control devices pay attention to those devices by monitoring their performance on an ongoing basis. The CAM rule establishes the requirements to implement that monitoring for the operating permit program in a cost-effective manner.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of pollutant-specific emission units.

Respondent's obligation to respond: Mandatory (40 CFR part 64).

Estimated number of respondents: 22,153 (total).

Frequency of response: Semiannually.

Total estimated burden: 23,510 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,423,000 (per year) which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an overall decrease of 1,080 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to a correction of mathematical errors found in the previous ICR renewal. While the total estimated annual burden decreased, the total annual cost increased due to updated labor rates from the currently approved ICR.

The CAM program was designed to ensure monitoring provisions associated with the prevention of significant deterioration (PSD) program were included in the Title V permits and updated as necessary. The owners or operators were required to develop monitoring plans for sources with active control devices. The agency envisioned that, over time, all the title V permits would be issued and would require CAM rule requirements. Current burden reduction for the CAM rule is based on complete issuance of title V permits, meaning no additional sources with active control devices need CAM plans; only ongoing, not new, CAM is needed. Since there are no new CAM plans, only review of existing CAM plans, the

renewal review hours drop. No changes to the CAM rule keep costs the same (*i.e.*, no increase in burden). Moreover, familiarity with existing CAM plan requirements should reduce source and regulatory review burden.

Director, Regulatory Support Division.
