

with diverse geographic, cultural and socio-economic backgrounds, individuals with disabilities, and individuals from other underserved communities. The program recognizes the increasing importance of information technology by emphasizing programs that teach digital literacy skills; develop library services that provide all users with access to information through local, State, regional, national, and international collaborations and networks; and establish or enhance electronic and other linkages among and between libraries and other entities. A State Library Administrative Agency ("SLAA") is the official agency of a State charged by law with the extension and development of public library services throughout the State. To receive funds under the Grants to States program, each SLAA must submit to the Director of IMLS a State Plan detailing certain goals, assurances, and procedures for a five-year period. A State Plan is a document that identifies a State's library needs, sets forth the activities to be taken toward meeting the identified needs supported with the assistance of Federal funds made available under subchapter II (Library Services and Technology, "LSTA") and provides assurances that the officially designated SLAA has the fiscal and legal authority and capability to administer all aspects of any award under the Grants to States program. The State Plan must also provide assurances for establishing the State's policies, priorities, criteria, and procedures necessary to the implementation of all programs under the LSTA.

IMLS authorizing legislation directs State Library Administrative Agencies (SLAAs) to "independently evaluate, and report to the Director regarding, the activities assisted under this subchapter, prior to the end of the Five Year Plan." This evaluation provides SLAAs an opportunity to measure progress in meeting the goals set in their approved Five Year Plans with a framework to synthesize information across all state reports in telling a national story.

This action is to seek approval for the instructions for the Guidelines for IMLS Grants to States Five-Year Evaluation for the next three years.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG-1284, "Anchoring Components and Structural Supports in Concrete." This proposed guide, Revision 1 of Regulatory Guide (RG) 1.199 of the same name, endorses Appendix D, "Anchoring to Concrete," of an updated version of American Concrete Institute code ACI 349, "Code Requirements for Nuclear Safety-Related Concrete Structures and Commentary (2013)." The previous version of RG 1.199 endorsed ACI 349-1997. It also endorses ACI 355.2-07, "Qualification of Post-Installed Mechanical Anchors in Concrete and Commentary," and ASTM E488-15, "Standard Test Methods for Strength of Anchors in Concrete Elements."

DATES: Submit comments by June 21, 2019. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. B. Submitting Comments

Please include Docket ID NRC-2019-0101 in your comment submission, in

order to ensure that the NRC is able to make your comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at <http://www.regulations.gov> as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, "Anchoring Components and Structural Supports in Concrete," is temporarily identified by its task number, DG-1284. It is proposed revision 1 of RG 1.199. This revision addresses changes in standards endorsed by Revision 0 of RG 1.199 since its issuance in November 2003. Among the revised standards endorsed by this RG are Appendix D, "Anchoring Components and Structural Supports in Concrete," of ACI 349-13, "Code Requirements for Nuclear Safety-Related Concrete Structures and Commentary," ACI 355.2-07, "Qualification of Post-Installed Mechanical Anchors in Concrete and Commentary," and ASTM E488-15, "Standard Test Methods for Strength of Anchors in Concrete Elements."

III. Backfitting and Issue Finality

As discussed in the "Implementation" section of DG-1284, the NRC has no current intention to impose this draft regulatory guide on holders of current

operating licenses or combined licenses. Accordingly, the issuance of this draft regulatory guide, if finalized, would not constitute "backfitting" as defined in section 50.109(a)(1) of title 10 of the *Code of Federal Regulations* (10 CFR) of the Backfit Rule or be otherwise inconsistent with the applicable issue finality provisions in 10 CFR part 52.

This draft regulatory guide may be applied to applications for operating licenses and combined licenses docketed by the NRC as of the date of issuance of the final regulatory guide, as well as future applications for operating licenses and combined licenses submitted after the issuance of the regulatory guide. Such action would not constitute backfitting as defined in 10 CFR 50.109(a)(1) or be otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants or potential applicants are not within the scope of entities protected by the Backfit Rule or the relevant issue finality provisions in 10 CFR part 52.

Dated at Rockville, Maryland, this 16th day of April, 2019.

For the Nuclear Regulatory Commission.

Thomas H. Boyce,

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.
