DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Census Bureau.

Title: Information and

Communication Technology Survey (ICTS).

Form Number(s): ICT-1(S), ICT-1(M), and ICT-1(L).

Agency Approval Number: None.

Type of Request: New collection.

Burden: 74,900 hours.

Number of Respondents: 46,000.

Avg Hours Per Response: 1 hour and 38 minutes.

Needs and Uses: For several years, economic data users and policymakers have been concerned about the lack of available data related to e-business infrastructure investment. Such data are critical for evaluating productivity growth, changes in industrial capacity, measures of economic performance, and current economic developments. Rapid changes and advances in Information and Communication Technology (ICT) equipment have resulted in these assets having short useful lives and a tendency to be replaced much quicker than other types of equipment. Companies are expensing the full cost of such assets during the current annual period rather than capitalizing the value of such assets and expensing the cost over two or more years. In some cases this is due to the short useful life of the asset, and in other cases this is because companies have varying dollar levels for capitalization.

The Annual Capital Expenditures Survey (ACES) (OMB # 0607-0782) currently collects annual data on business capital expenditures and detailed types of structures and equipment data every five years with the next such collection in the 2003 ACES. This infrequent collection of types of structures and equipment detail
