

Endangered Species (CITES) (see 16 U.S.C. 1538(e)).

This IC includes the following permit/license application forms:

(1) FWS Form 3-200-2 (Designated Port Exception Permit). Under 50 CFR 14.11, it is unlawful to import or export wildlife or wildlife products at ports other than those designated in 50 CFR 14.12 unless you qualify for an exception. These exceptions allow qualified individuals, businesses, or scientific organizations to import or export wildlife or wildlife products at a nondesignated port:

(a) When the wildlife or wildlife products will be used as scientific specimens.

(b) To minimize deterioration or loss.

(c) To relieve economic hardship.

To request an import or export of wildlife or wildlife products at nondesignated ports, applicants must complete FWS Form 3-200-2.

Designated port exception permits are valid for 2 years.

(2) FWS Form 3-200-3 (Import/Export License). It is unlawful to import or export wildlife or wildlife products for commercial purposes without first

obtaining an import/export license (50 CFR 14.91). Applicants must complete FWS Form 3-200-3 to request this license. We use the information that we collect on the application as an enforcement tool and management aid to: (a) Monitor the international wildlife market and (b) detect trends and changes in the commercial trade of wildlife and wildlife products. Import/export licenses are valid for 1 year.

We require import/export licensees to maintain records that accurately describe each importation or exportation of wildlife or wildlife products made under the license, and any additional sale or transfer of the wildlife or wildlife products. In addition, licensees must make these records and the corresponding inventory of wildlife or wildlife products available for our inspection at reasonable times, subject to applicable limitations of law. We believe the burden associated with these recordkeeping requirements is minimal because the records already exist. Importers and exporters must complete FWS Form 3-177 (Declaration for Importation or Exportation of Fish or

Wildlife) for all imports or exports of wildlife or wildlife products. This form provides an accurate description of the imports and exports. OMB has approved the information collection for FWS Form 3-177 and assigned OMB Control Number 1018-0012, which expires January 31, 2010. Normal business practices should produce records (e.g., invoices or bills of sale) needed to document additional sales or transfers of the wildlife or wildlife products.

II. Data

OMB Control Number: 1018-0092.

Title: Federal Fish and Wildlife License/Permit Applications, Law Enforcement.

Service Form Number(s): 3-200-2 and 3-200-3.

Type of Request: Revision of currently approved collection.

Affected Public: Individuals, businesses, and scientific institutions.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Estimated Annual Nonhour Burden: \$1,567,300 for fees associated with permit applications.

Activity	Number of annual respondents	Number of annual responses	Completion time per response	Annual burden hours
3-200-2 – Application for Designated Port Exception Permit	1,173	1,173	1 hour	1,173
3-200-3 – Application for Import/Export License	14,500	14,500	1 hour	14,500
3-200-3 – Recordkeeping	*14,500	*14,500	15 minutes	3,625
Totals	15,673	15,673	19,298

**Not included in total because the respondents for the recordkeeping requirement are the same as those for the application.*

III. Request for Comments

We invite comments concerning this IC on:

(1) whether or not the collection of information is necessary, including whether or not the information will have practical utility;

(2) the accuracy of our estimate of the burden for this collection of information;

(3) ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. We will include and/or summarize each comment in our request to OMB to approve this IC. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that

your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: March 23, 2007

Hope Grey,

Information Collection Clearance Officer,
Fish and Wildlife Service.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Final Comprehensive Conservation Plan (CCP), Wilderness Stewardship Plan (WSP) and Environmental Impact Statement (EIS) for Cabeza Prieta National Wildlife Refuge (Refuge), Ajo, AZ

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces that the Final CCP is available for the Cabeza Prieta National Wildlife Refuge (Refuge). This CCP is prepared pursuant to the National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997, the National Environmental Policy Act of 1969, and the Wilderness Act of 1964. The CCP describes how the Service intends to manage this Refuge over the next 15 years.

DATES: A Record of Decision may be signed no sooner than 30 days after publication of this notice (40 CFR 1506.10(b)(2)).

ADDRESSES: Copies of the CCP are available on compact disk or in hard copy, and can be obtained by writing: U.S. Fish and Wildlife Service, John Slown, Division of Planning, P.O. Box 1306, Albuquerque, New Mexico 87103.

FOR FURTHER INFORMATION CONTACT: Roger DiRosa, Refuge Manager, Cabeza Prieta National Wildlife Refuge, 1611 North Second Street, Ajo, Arizona 85321; 520-387-4993 or John Slown (See **ADDRESSES**), telephone: 505-248-7458; or e-mail to john_slown@fws.gov.

SUPPLEMENTARY INFORMATION: The Cabeza Prieta National Wildlife Refuge is located in Pima and Yuma Counties in southwestern Arizona. This 860,010 acre Refuge is comprised of several northwest to southeast trending mountain ranges separated by broad alluvial valleys. Located in the heart of the Sonoran Desert, the Refuge's habitats support a diversity of desert wildlife.

Cabeza Prieta National Wildlife Refuge was withdrawn from the public domain by Executive Order 8038 in 1939, and set apart " * * * for the conservation and development of natural wildlife resources, and for the protection and improvement of public grazing lands and natural forage resources * * * Provided, however, that all the forage resources in excess of that required to maintain a balanced wildlife population within this range or preserve should be available for livestock." When the last grazing leases on the Refuge expired in 1981 the grazing purpose of the Refuge was no longer valid. The Arizona Desert Wilderness Act of 1990 designated 803,418 acres of the Refuge, or approximately 93 percent of the Refuge area, as federal wilderness.

The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee *et seq.*), requires the Service to develop a CCP for each National Wildlife Refuge. The purpose of developing CCPs is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife science, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, the CCPs identify wildlife-dependent recreational opportunities available to the public,

including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. These CCPs will be reviewed and updated at least every 15 years in accordance with the National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997.

The availability of Cabeza Prieta National Wildlife Refuge's Draft CCP, WSP and EIS for public review and comment was announced in the **Federal Register** on March 16, 2005 (70 FR 12895-12896), the comment period closed on August 15, 2005. The Draft CCP, WSP and EIS propose and evaluate five management alternatives for the Refuge. All management alternatives implement recovery actions for the Endangered Sonoran pronghorn. The alternatives differ primarily in the level of active management intervention proposed to support the desert bighorn sheep. The first alternative is "no action" or continuance of current Refuge management. Under this alternative, the Refuge would continue to offer a limited desert bighorn sheep hunt each year in cooperation with the Arizona Game and Fish Department. Refuge staff would continue to maintain and supply supplemental water to existing developed waters in desert bighorn sheep habitat. The second alternative focuses on limiting management interventions within Refuge wilderness. Under this alternative, developed wildlife waters in sheep habitat within the Refuge wilderness would not be maintained or supplied with supplemental water. The desert bighorn sheep hunt would also be discontinued. The third alternative includes limited management intervention in wilderness. Under this alternative, the Refuge would supply supplemental water to developed waters in sheep habitat within Refuge wilderness only during periods of severe drought. The desert bighorn sheep hunt would be continued, but no hunting would be allowed during years of severe drought. The fourth alternative, identified as the Service's preferred alternative, would allow continued maintenance and water supply to existing developed waters in sheep habitat within Refuge wilderness and would include projects to increase the water collection efficiency of such waters. The Refuge desert bighorn sheep hunt program would continue unchanged under this alternative. The fifth alternative would include the maximum management intervention within Refuge wilderness. Under this

alternative all existing developed waters in Refuge wilderness would be maintained and supplied with water, and new developed waters would be created. The desert bighorn sheep hunt program would continue unchanged under this alternative.

Dated: August 3, 2006.

Larry G. Bell,

Acting Regional Director, U.S. Fish and Wildlife Service, Albuquerque, New Mexico.

This document was received at the Office of the **Federal Register** on April 18, 2007.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of Final Comprehensive Conservation Plan (CCP) for Salt Plains National Wildlife Refuge, Jet, OK

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces that the Final CCP is available for Salt Plains National Wildlife Refuge (Refuge). This CCP was prepared pursuant to the National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997, and the National Environmental Policy Act of 1969. Goals and objectives in the CCP describe how the Service intends to manage the Refuge over the next 15 years.

ADDRESSES: Copies of the CCP are available on compact disk or in hard copy, and can be obtained by writing: Chris Perez, Natural Resource Planner, U.S. Fish and Wildlife Service, Route 2, Box 202A, Alamo, Texas 78516. The CCP may also be available for viewing or downloaded online at: <http://www.fws.gov/southwest/refuges/plan/index.html>.

FOR FURTHER INFORMATION CONTACT: Jon M. Brock, Refuge Manager, Salt Plains National Wildlife Refuge, Route 1, P.O. Box 76, Jet, Oklahoma 73749; telephone: 580-626-4794; or Chris Perez (See **ADDRESSES**), telephone: 956-784-7553; e-mail: chris_perez@fws.gov.

SUPPLEMENTARY INFORMATION: The Salt Plains National Wildlife Refuge is located on the Salt Fork of the Arkansas River at the Great Salt Plains Lake in north-central Oklahoma. This 32,028 acre refuge is roughly equal parts of upland, open water, and salt flats at the
