

January 2011. The NRC staff has re-written DG-1245 to more clearly identify the dams and other water control structures subject to this guidance document and is issuing it for a second round of public review and comment.

Since the release of Revision 1 of RG 1.127 in March 1978, the Federal guidelines for safety and inspection of dams and other water control structures have undergone significant revision. This DG is being updated to provide licensees and applicants with the most current guidance and to help ensure that applicants and licensees are able to demonstrate compliance with the applicable regulations.

This DG describes a method the staff of the NRC considers acceptable for designing and developing appropriate inservice inspection (ISI) and surveillance programs for dams, slopes, canals, and other water-control structures associated with emergency cooling water systems or flood protection of nuclear power plants.

This DG applies only to water control structures (e.g., dams, slopes, canals, reservoirs, and associated conveyance facilities) which are part of the nuclear power plant and whose failure could either cause site flooding, the failure of the plant's emergency cooling systems, or otherwise endanger the plant.

III. Backfitting and Issue Finality

This DG, if finalized, does not constitute backfitting as defined in § 50.109 of Title 10 of the *Code of Federal Regulations* (10 CFR) (the Backfit Rule), and is not otherwise inconsistent with the issue finality provisions in 10 CFR part 52, "Licenses, Certifications and Approvals for Nuclear Power Plants." This DG provides guidance on one possible means for meeting NRC's regulatory requirements for developing appropriate ISI and surveillance programs for dams, slopes, canals, and other water-control structures associated with emergency cooling and flood protection water systems as required by General Design Criterion (GDC) 45, "Inspection of Cooling Water System," of Appendix A, "General Design Criteria for Nuclear Power Plants," to 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities" (10 CFR part 50).

Existing licensees and applicants of final design certification rules will not be required to comply with the new positions set forth in this DG, unless the licensee or design certification rule applicant seeks a voluntary change to its licensing basis with respect to ISI or surveillance programs for water control structures, and where the NRC

determines that the safety review must include consideration of the ISI or surveillance program. Further information on the staff's use of the DG, if finalized, is contained in the DG under Section D. Implementation.

Dated at Rockville, Maryland, this 16th day of January, 2015.

For the Nuclear Regulatory Commission.

Harriet Karagiannis,

Acting Branch Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-302; NRC-2015-0010]

Duke Energy Florida, Inc.; Crystal River Unit 3 Nuclear Generating Plant

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact; final issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of exemptions in response to a March 28, 2014, request from Duke Energy Florida, Inc. (DEF or the licensee), representing itself and the other owners of the Crystal River Unit 3 Nuclear Generating Plant (CR-3). One exemption would permit the licensee to use funds from the CR-3 decommissioning trust (the Trust) for irradiated fuel management and site restoration activities. Another exemption would allow the licensee to use withdrawals from the Trust for these activities without prior notification to the NRC. The NRC staff is issuing a final Environmental Assessment (EA) and final Finding of No Significant Impact (FONSI) associated with the proposed exemptions.

ADDRESSES: Please refer to Docket ID NRC-2015-0010 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- **Federal Rulemaking Web site:** Go to <http://www.regulations.gov> and search for Docket ID NRC-2015-0010. Address questions about NRC dockets to Carol Gallagher; telephone: 301-287-3422; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER**

INFORMATION CONTACT section of this document.

- **NRC's Agencywide Documents Access and Management System (ADAMS):** You may obtain publicly-available documents online in the ADAMS public documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if that document is available in ADAMS) is provided the first time that a document is referenced. The request for exemption, dated March 28, 2014, is available in ADAMS under Accession No. ML14098A037.

- **NRC's PDR:** You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Michael Orenak, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-3229; email: Michael.Orenak@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of exemptions from Sections 50.82(a)(8)(i)(A) and 50.75(h)(2) of Title 10 of the *Code of Federal Regulations* (10 CFR) for Facility Operating License No. DPR-72, issued to DEF, for CR-3, located in Citrus County, Florida. The licensee requested the exemptions by letter dated March 28, 2014. The exemptions would allow the licensee to use funds from the Trust for irradiated fuel management and site restoration activities without prior notice to the NRC, in the same manner that funds from the Trust are used under 10 CFR 50.82(a)(8) for decommissioning activities. Consistent with 10 CFR 51.21, the NRC has reviewed the requirements in 10 CFR 51.20(b) and 10 CFR 51.22(c) and has determined that an EA is the appropriate form of environmental review. Based on the results of the EA, which is provided in Section II below, the NRC is issuing this final FONSI.

II. Environmental Assessment

Description of the Proposed Action

The proposed action would exempt DEF from meeting the requirements set forth in 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(2). Specifically, the

proposed action would allow DEF to use funds from the Trust for irradiated fuel management and site restoration activities not associated with radiological decontamination and would exempt DEF from meeting the requirement for prior notification to the NRC for these activities.

The proposed action is in accordance with the licensee's application dated March 28, 2014.

Need for the Proposed Action

By letter dated February 20, 2013 (ADAMS Accession No. ML13056A005), DEF informed the NRC that it had permanently ceased power operations at CR-3 and that the CR-3 reactor vessel had been permanently defueled. CR-3 has not operated since September 2009.

As required by 10 CFR 50.82(a)(8)(i)(A), decommissioning trust funds may be used by the licensee if the withdrawals are for legitimate decommissioning activity expenses, consistent with the definition of decommissioning in 10 CFR 50.2. This definition addresses radiological decontamination and does not include activities associated with irradiated fuel management or site restoration. Similarly, the requirements of 10 CFR 50.75(h)(2) restrict the use of decommissioning trust fund disbursements (other than for ordinary and incidental expenses) to decommissioning expenses until final decommissioning has been completed. Therefore, exemptions from 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(2) are needed to allow DEF to use funds from the Trust for irradiated fuel management and site restoration activities.

The licensee states that the Trust contains funds for decommissioning that are commingled with funds intended for irradiated fuel management and other site restoration activities not associated with radiological decontamination. The adequacy of funds in the Trust to cover the costs of activities associated with irradiated fuel management and site restoration in addition to radiological decontamination through license termination is supported by the CR-3 Annual Decommissioning and Irradiated Fuel Management Financial Status Report submitted by DEF in a March 31, 2014, letter (ADAMS Accession No. ML14098A039). The licensee states that it needs access to the funds in the Trust in excess of those needed for radiological decontamination to support irradiated fuel management and other site restoration activities not associated with radiological decontamination.

The requirements of 10 CFR 50.75(h)(2) further provide that, except for decommissioning withdrawals being made under 10 CFR 50.82(a)(8) or for payments of ordinary administrative costs and other incidental expenses of the Trust, no disbursement may be made from the Trust until written notice of the intention to make a disbursement has been given to the NRC at least 30 working days in advance of the intended disbursement. Therefore, an exemption from 10 CFR 50.75(h)(2) is needed to allow DEF to use funds from the Trust for irradiated fuel management and site restoration activities without prior NRC notification.

In summary, by letter dated March 28, 2014, DEF requested exemptions to allow Trust withdrawals, without prior written notification to the NRC, for irradiated fuel management and site restoration activities.

Environmental Impacts of the Proposed Action

The proposed action involves exemptions from requirements that are of a financial or administrative nature and that do not have an impact on the environment. The NRC has completed its evaluation of the proposed action and concludes that there is reasonable assurance that adequate funds are available in the Trust to complete all activities associated with decommissioning, site restoration, and irradiated fuel management. There is no decrease in safety associated with the use of the Trust to fund activities associated with irradiated fuel management and site restoration. Section 50.82(a)(8)(v) of 10 CFR requires a licensee to submit a financial assurance status report annually between the time of submitting its decommissioning cost estimate and submitting its final radiation survey and demonstrating that residual radioactivity has been reduced to a level that permits termination of its license. If the remaining balance, plus expected rate of return, plus any other financial surety mechanism does not cover the estimated costs to complete the decommissioning, additional financial assurance must be provided. These annual reports provide a means for the NRC to monitor the adequacy of available funding. Since the exemptions would allow DEF to use funds from the Trust that are in excess of those required for radiological decontamination of the site and the adequacy of funds dedicated for radiological decontamination are not affected by the proposed exemptions, there is reasonable assurance that there will be

no environmental impact due to lack of adequate funding for decommissioning.

The proposed action will not significantly increase the probability or consequences of accidents. No changes are being made in the types of effluents that may be released offsite. There is no significant increase in the amount of any effluent released offsite. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not have any foreseeable impacts to land, air, or water resources, including impacts to biota. In addition, there are no known socioeconomic or environmental justice impacts associated with such proposed action. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (*i.e.*, the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The proposed action does not involve the use of any different resources than those previously considered in the Final Environmental Statement for CR-3, dated May 1973 (ADAMS Accession No. ML091520178).

Agencies or Persons Consulted

The staff did not enter into consultation with any other Federal Agency or with the State of Florida regarding the environmental impact of the proposed action. On October 14, 2014, the Florida state representatives were notified of the EA and FONSI.

III. Finding of No Significant Impact

The licensee has proposed exemptions from 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(2), which would allow DEF to use funds from the Trust for irradiated fuel management and site restoration activities, without prior written notification to the NRC.

Consistent with 10 CFR 51.21, the NRC conducted the environmental assessment for the proposed action included in Section II above and incorporated by reference in this finding. On the basis of this environmental assessment, the NRC concludes that the proposed action will not have significant effects on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action. Other than the licensee's letter, dated March 28, 2014, there are no other environmental documents associated with this review. This document is available for public inspection as indicated above.

Dated at Rockville, Maryland, this 15th day of January, 2015.

For the Nuclear Regulatory Commission.

Douglas A. Broaddus,

Chief, Plant Licensing Branch IV-2 and Decommissioning Transition Branch, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2015-0009]

In the Matter of All Operating Reactor Licensees With Mark I Containments

AGENCY: Nuclear Regulatory Commission.

ACTION: Director's decision under 10 CFR 2.206; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued a director's decision with regard to a petition dated April 13, 2011, filed by Mr. Paul Gunter, Director for Reactor Oversight Project of Beyond Nuclear (the petitioner), requesting that the NRC take action with regard to all operating General Electric (GE) Boiling Water Reactor (BWR) licensees with Mark I primary containment system (the licensees).

DATES: January 23, 2015.

ADDRESSES: Please refer to Docket ID NRC-2015-0009 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2015-0009. Address questions about NRC dockets to Carol Gallagher; telephone: 301-287-3442;

email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that a document is referenced.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Siva P. Lingam, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-1564, email: Siva.Lingam@nrc.gov.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Deputy Director, Office of Nuclear Reactor Regulation, has issued a director's decision (ADAMS Accession No. ML14337A243) on a petition filed by the petitioner on April 13, 2011 (ADAMS Accession No. ML11104A058).

The petitioner requested that the NRC order the immediate suspension of the operating licenses of all GE BWRs that utilize the Mark I primary containment system. As the basis of the request, the petitioner cited the events in Japan at the Fukushima Dai-Ichi nuclear power plant.

On June 8, 2011 and October 7, 2011, the petitioner met with the NRC's Petition Review Board. The meeting provided the petitioner an opportunity to provide additional information and to clarify the issues cited in the petition. Information regarding those meetings, including meeting transcripts are available in ADAMS under Package Accession Nos. ML11166A137 and ML11292A159 respectively.

The NRC sent a copy of the proposed director's decision to the petitioner and the licensees for comments on October 27, 2014 (ADAMS Package Accession No. ML14198A098). The petitioner and the licensees were asked to provide comments within 30 days on any part of

the proposed director's decision that was considered to be erroneous or any issues in the petition that were not addressed. The NRC staff did not receive comments on the proposed director's decision.

The Deputy Director of the Office of Nuclear Reactor Regulation has determined that the request, to require that the NRC order the immediate suspension of the operating licenses of all GE BWRs that utilize the Mark I primary containment system, was resolved through the issuance of orders, written statements in accordance with Title 10 of the *Code of Federal Regulations* (10 CFR), rulemaking, and the Emergency Response Data System initiative. The reasons for this decision are explained in the director's decision (DD-15-01) pursuant to 10 CFR 2.206 of the Commission's regulations.

The NRC will file a copy of the director's decision with the Secretary of the Commission for the Commission's review in accordance with 10 CFR 2.206. As provided by this regulation, the director's decision will constitute the final action of the Commission 25 days after the date of the decision unless the Commission, on its own motion, institutes a review of the director's decision in that time.

Dated at Rockville, Maryland, this 15th day of January, 2015.

For the Nuclear Regulatory Commission.

Jennifer L. Uhle,

Deputy Director, for Reactor Safety Programs Office of Nuclear Reactor Regulation.

[FR Doc. 2015-01197 Filed 1-22-15; 8:45 am]

BILLING CODE 7590-01-P

PENSION BENEFIT GUARANTY CORPORATION

Proposed Submission of Information Collections for OMB Review; Comment Request; Reportable Events; Notice of Failure To Make Required Contributions

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of intention to request extension of OMB approval of revised collections of information.

SUMMARY: The Pension Benefit Guaranty Corporation (PBGC) intends to request that the Office of Management and Budget (OMB) extend approval (with modifications), under the Paperwork Reduction Act, of two collections of information under PBGC's regulation on Reportable Events and Certain Other Notification Requirements (OMB control numbers 1212-0013 and 1212-0041, expiring March 31, 2015). This notice
