**Abstract:** This supporting statement is for a revision to an existing Information Collection Request (ICR) for four mobile source-related grant programs administered by the Environmental Protection Agency's (EPA) Office of Transportation and Air Quality (OTAQ). These four programs include: Diesel Emission Reduction Act (DERA) Grant Program, Clean School Bus (CSB) Grant Program, Clean Heavy-Duty Vehicles (CHDV) Grant Program, and Clean Ports Grant Program. The EPA currently uses this ICR to collect information to administer these programs, but to reflect the final program design and to further ease the burden for participants and Agency staff, the Agency needs to update this ICR to be able to use improved versions of previously approved instruments and collect information via three new reporting instruments. This ICR revision enhances project reporting instruments to ensure that the project reporting templates align with the final program design and requirements and incorporate user feedback received during the application period for the CHDV and Clean Ports Grant Programs.

EPA uses approved procedures and forms to collect necessary information to operate its grant programs and has been providing grants under DERA since 2008. EPA launched the Clean Port Program and Clean Heavy-Duty Vehicles Program in early 2024 and is overseeing the 2023 Clean School Bus Grantees. While these programs each have unique statutory requirements, there are key aspects that unite them, and by combining them as a cohort of programs under one ICR, EPA aims to enrich data quality across our programs and to ease burden on participants and agency staff overseeing multiple programs. Additionally, this collection will enhance the Agency's oversight of these projects as directed by Congress. The data collected will enable verification each project's programmatic compliance and support the Agency's commitment to prevent any potential fraud, waste, and abuse. Finally, the data collected supports OTAQ's mission to protect human health and the environment by reducing emissions from mobile sources and advancing clean fuels and technology, in alignment with Pillar 1: Clean Air, Land, and Water for Every American of Administrator Zeldin's Powering the Great American Comeback Initiative.
