

S&T and the State of Oklahoma are partnering on the RAPS project to test and evaluate Small Unmanned Aircraft Systems (SUAS) for potential use by the first responder community and DHS operational components. SUAS include small aircraft (typically under 55 pounds and having wingspans of 3–6 feet or less) that are operated using a wireless ground control station. The aircraft are equipped with sensors and cameras that can capture images and transmit them to a ground control system to provide aerial views of emergency situations and situational awareness. S&T conducted a PIA to address the privacy impact of the system's surveillance and image capturing capabilities.

System: DHS/USCG/PIA-001(b) Homeport Internet Portal.

Component: USCG.

Date of approval: November 16, 2012.

USCG currently uses the Homeport Internet Portal to provide secure information dissemination, advanced collaboration for Area Maritime Security Committees, electronic submission and approval for facility security plans, and complex electronic notification capabilities. Homeport includes a subsystem called the Alert Warning System (AWS), which provides USCG Headquarters, Districts, Sectors, and other units an enterprise solution for sending alerts and warnings to maritime security (MARSEC) partners, stakeholders, and appropriate port constituents for MARSEC level changes and other MARSEC-related activities requiring port-wide notifications. Through a Memorandum of Agreement between the USCG and the Transportation Security Administration (TSA), use of AWS capabilities will be shared between these two DHS components, thereby leveraging DHS investment in the system and avoiding duplicative operations and maintenance costs within DHS. The USCG issued this PIA update to include TSA operations center personnel as authorized users of Homeport's AWS, which contains non-sensitive PII and disseminates airport security information to authorized recipients.

System: DHS/ICE/PIA-029 Alien Medical Records Systems.

Component: ICE.

Date of approval: November 27, 2012.

ICE maintains medical records on aliens that ICE detains for violations of U.S. immigration law. Aliens held in ICE custody in a facility staffed by the ICE Health Services Corps, a division of ICE's Office of Enforcement and Removal Operations, receive physical exams and treatment, dental services, and pharmacy services, depending on

the alien's medical conditions and length of stay. To properly record the medical assessments and services, ICE operates the following information technology systems that maintain electronic medical record information: CaseTrakker, MedEZ, Dental X-Ray System, the Criminal Institution Pharmacy System, the Medical Payment Authorization Request Web System (MedPAR), and the Medical Classification Database. This PIA was originally published on July 25, 2011, and described the information in these medical record systems, the purposes for which this information was collected and used, and the safeguards ICE had implemented to mitigate the privacy and security risks to PII stored in these systems. The PIA was republished in full primarily to modify the description of the MedPAR system, which originally was to be hosted by the U.S. Department of Veterans Affairs, but now remains at ICE.
