

disease in a defined geographic area, the contribution of chronic viral hepatitis to the burden of disease, and the influence of etiologic agent(s) and other factors on mortality, and to monitor the incidence of and mortality from chronic liver disease over time. The information gathered will be analyzed in conjunction with data collected from

other sources to address these questions. The results of the project will assist the Hepatitis Branch, Division of Viral and Rickettsial Diseases, National Center for Infectious Diseases in accomplishing the part of its mission related to preparing recommendations for the prevention and control of all types of viral hepatitis and their sequella. In order to focus on

prevention efforts and resource allocation, a representative view of the overall burden of chronic liver disease, its natural history, and the relative contribution of viral hepatitis is needed. The total annualized estimated cost to respondents is \$5,000.

Respondents	No. of respondents	No. of responses per respondent	Average burden per response in hours	Total burden in hours
All Consenting adults with physician-diagnosed chronic liver disease living in catchment areas	500	1	1	500
Total	500
