

records almost entirely to electronic record keeping and storage.

Storage Cost:⁴ In addition to the FERC-555A labor (burden cost provided above), there are additional costs that represent record retention and storage costs. Previously, the estimate included paper storage costs, but firms no longer rely on paper storage to maintain the majority of their records, therefore the Commission is removing the costs for paper storage. For electronic storage, the Commission estimates \$10.00 per respondent annually. Total annual electronic storage cost to industry (\$10.00 × 51 respondents): \$510. This calculation estimates storage of 1GB per year at \$10.00. We expect that this estimate should continue to trend downward over time as the cost of electronic storage technology, including cloud storage, continues to decrease. For example, external hard drives of approximately 1,000 GB are available for approximately \$75. In addition, cloud storage plans from multiple providers for 1TB of storage (with a reasonable amount of requests and data transfers) are available for less than \$7 per month.

Comments: Comments are invited on: (1) whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information collections; and (4) ways to minimize the burden of the collections of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.
