*Abstract:* With this ICR renewal, EPA is seeking permission to continue recordkeeping and reporting requirements to authorize renewable fuel producers using certain foreign-grown feedstocks to use an aggregate approach to comply with the renewable

biomass verification provisions, akin to that applicable to producers using crops and crop residue grown in the United States. For this authorization, foreign based entities may petition EPA for approval of the aggregate compliance approach for specified renewable fuel feedstocks either in a foreign country as a whole or in a specified geographical area. This petition request for the aggregate compliance approach for foreign-grown crops and crop residue is voluntary, though, if approved by EPA, will offer the benefit that certain renewable biomass produced in a foreign country or geographical area can be counted as feedstock to make renewable fuel for credit under the Renewable Fuel Standard (RFS2) program in 40 CFR Part 80.

*Form numbers:* None.

*Respondents/affected entities:* 15.

*Respondent's obligation to respond:* Voluntary.

*Estimated number of respondents:* 15 (total).

*Frequency of response:* On occasion.

*Total estimated burden:* 200 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$22,794 (per year), includes no annualized capital or operation & maintenance costs.

*Changes in estimates:* There is no increase of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The respondent universe and responses also remained the same in this collection. There was an increase in cost to the industry of \$8,598 per year due to better numbers used to calculate the industry burden and to account for inflation.
