

by the State on behalf of the Federal Government under 11 revenue-sharing laws specified at (31 U.S.C. 6903(a)(1)). BLM provides the States with a printout matrix designed to facilitate recording the requested information. Each printout lists each qualifying unit of local government down the left hand side of the page along with the unit of local government code used by the Census Bureau. Across the top of the printout are columns which indicate each of the revenue Acts. BLM uses the information provided by the States to compute the PILT payments to local governments within the State.

Based on BLM's experience in administering PILT, BLM estimates each State's reporting burden for this information collection to average 20 hours. The respondents already maintain this information for their own record-keeping purposes and need only transfer it to the matrix described above. The estimate includes time for research, time to transcribe and audit the data, and time to prepare the PILT submission. The respondents are offices designated by the Governor of each State, usually the Treasurer's office. The frequency of response is once annually, reporting on the previous fiscal year's revenues. The number of responses per year is 50. The estimated total annual burden on the States collectively is about 1,000 hours.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will also become a matter of public record.
