SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant proposes to conduct research on Pacific harbor seals (*Phoca vitulina*), California sea lions (*Zalophus californianus*), and northern elephant seals (*Mirounga angustirostris*) within coastal waters and on pinniped rookeries and haul outs of Washington and Oregon. Research activities would include aerial, vessel, and ground surveys; capture for collection of tissue samples, attachment of scientific instruments and application of marks (flipper tags, brands, etc.); and underwater playback experiments. The purpose of the research is to investigate: (1) abundance and distribution of harbor seals; (2) food habits and foraging ecology of harbor seals; (3) the ecology of contaminants, environmental toxins and infectious pathogens in harbor seals; (4) harbor seal life history parameters; (5) population substructure in harbor seals in Washington and Oregon; (6) abundance, distribution and health of California sea lions in Washington and Oregon; (7) California sea lion food habits and predation of threatened, endangered, and/or depleted fish stocks in Washington and Oregon; and (8) the abundance, distribution and health of northern elephant seals. The objective of the research is to provide information necessary for stock assessments and for management, including management of marine mammal predation on threatened and

endangered salmon. The permit would be valid for five years and would authorize level B and level A harassment, including research-related mortality of limited numbers of each species. Please refer to the table in the application for the numbers of animals proposed for taking, and the locations and manner of such taking.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a draft environmental assessment (EA) has been prepared to examine whether significant environmental impacts could result from issuance of the proposed scientific research permit. Based on the analyses in the EA, it is NMFS initial determination that issuance of the permit would not significantly impact the quality of the human environment and that preparation of an environmental impact statement is not required.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: September 2, 2008.

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
