a speech disability may dial 711 (TTY,
TDD, or TeleBraille) to access
telecommunications relay services.
Individuals outside the United States
should use the relay services offered
within their country to make
international calls to the point-of-
contact in the United States.

SUPPLEMENTARY INFORMATION: In
accordance with the Paperwork
Reduction Act (PRA, 44 U.S.C. 3501 *et
seq.*) and its implementing regulations
at 5 CFR 1320.8(d)(1), all information
collections require approval under the
PRA. We may not conduct or sponsor
and you are not required to respond to

a collection of information unless it
displays a currently valid OMB control
number.

On July 6, 2022, we published a
Federal Register notice with a 60-day
public comment period soliciting
comments on this collection of
information (87 FR 40261). In that
notice, we solicited comments for 60
days, ending on September 6, 2022. In
an effort to increase public awareness
of, and participation in, our public
commenting processes associated with
information collection requests, the
Service also published the **Federal
Register** notice on [https://
www.regulations.gov](https://www.regulations.gov) [Docket No. FWS–
R4–OSA–2022–0086]. We received one
comment in response to that notice
which did not address the information
collection requirements; therefore, no
response was required.

As part of our continuing effort to
reduce paperwork and respondent
burdens, we invite the public and other
Federal agencies to comment on new,
proposed, revised, and continuing
collections of information. This helps us
assess the impact of our information
collection requirements and minimize
the public’s reporting burden. It also
helps the public understand our
information collection requirements and
provide the requested data in the
desired format.

We are especially interested in public
comment addressing the following:

- (1) Whether or not the collection of
information is necessary for the proper
performance of the functions of the
agency, including whether or not the
information will have practical utility;
- (2) The accuracy of our estimate of the
burden for this collection of
information, including the validity of
the methodology and assumptions used;
- (3) Ways to enhance the quality,
utility, and clarity of the information to
be collected; and
- (4) How might the agency minimize
the burden of the collection of
information on those who are to
respond, including through the use of
appropriate automated, electronic,
mechanical, or other technological
collection techniques or other forms of
information technology, *e.g.*, permitting
electronic submission of response.

Comments that you submit in
response to this notice are a matter of
public record. We will include or
summarize each comment in our request
to OMB to approve this ICR. Before
including your address, phone number,
email address, or other personal
identifying information in your
comment, you should be aware that
your entire comment—including your
personal identifying information—may

be made publicly available at any time.
While you can ask us in your comment
to withhold your personal identifying
information from public review, we
cannot guarantee that we will be able to
do so.

Abstract: The Fish and Wildlife Act of
1956 (16 U.S.C. 742d) designates the
Department of the Interior as a key
agency responsible for the conservation
and protection of wildlife and fisheries
resources in the United States. This
responsibility requires the Service to
gather accurate data on conservation
efforts through means such as research
to improve the development,
management, and advancement of
efforts. The Service’s Science
Applications and Migratory Bird
Program in the Service’s Southeast
Region is seeking to conduct a social
network analysis to collect information
regarding regional conservation efforts,
conservation partnership goals,
structure, and focal geography, and the
connectedness of these efforts and
partnerships. The proposed survey
collects information necessary to
address this gap in understanding and
will serve to advance the Southeast
Conservation Adaptation Strategy’s
(SECAS) leadership role as a regional
forum and decision-support hub.

The proposed survey collects the
following information:

- Familiarity and engagement with
SECAS, including satisfaction with
SECAS aspects and importance of
SECAS indicators (section 2);
- Organizational conservation
priorities, including level of importance
and usefulness of and reliance on
SECAS resources (section 3);
- Conservation partnerships,
including identification of partner
organizations and collaboration types
(section 4); and
- Organizational information,
including type of organization and
scope of work (section 5).

The information collected in this
effort will be used to develop multiple
products aimed at translating the data
into information that can strengthen
partnerships, identify gaps, and inform
conservation decisions.

The public may request a copy of the
proposed survey instrument by sending
a request to the Service Information
Collection Clearance Officer (see
ADDRESSES, above).

Abstract: Congress passed legislation specifically addressing oil and gas leasing on Osage lands and requiring Secretarial approval of leases. See 34 Stat. 543, section 3, as amended. The regulations at 25 CFR 226 implement that statute by specifying what information a lessee must provide related to drilling, development, and production of oil and gas on Osage reservation land. The oil, gas, and land are assets that the United States holds in trust or restricted status for Indian beneficiaries. The information collections in 25 CFR 226 are necessary to ensure that the beneficial owners of the mineral rights are provided the royalties due them, ensure that the oil and gas trust assets are protected, and to ensure that the surface estate assets are protected.
